How to Test Radiator Fan on Chevy Impala--Easy! - YouTube

SOURCE: 2001 Impala Cooling Fan Not coming on ever and car. Cooling fan relay switch (in the fuse box uner the hood). Look for othger relays in there that are the same type number (they are all marked). If you find one that is the same as the cooling fan relay, then swap the two relays and check.

SOLVED: How do I locate the fan sensor on my 2002 impala ...

The cooling fan relay takes the low voltage signal and internally switches the relay "on" to allow battery voltage to be supplied to the radiator cooling fan. By using a lower voltage signal to control the relay, there is less stress on the rest of the wiring and charging system.

How to Replace a Cooling Fan Relay on Most Vehicles ...

In your lower underhood fuse block on the passenger side, there are three relays that control your fans. They go #3, #2, #1 (L to R I believe). #1 controls the primary cooling fan (driver's side), #2 is the cooling fan control relay, and #3 is the secondary cooling fan (passenger side).

Chevrolet Impala Questions - Location Of Cooling Fan Relay ...

The cooling fan relay is the relay that controls the engine's cooling fans. When the correct parameters are met, a temperature switch or the computer will activate the relay, which will allow power to the fans. The relay will usually be activated once it is detected that the vehicle's temperature approaches excessively high temperatures.

2002 Chevrolet Impala Radiator Fan Assembly

2002 impala, no cooling fans. Scanner will turn on low speed fan, not high speed.Unplug coolant emp sensor, high speed fans come on, plug sensor in, turn key off low speed fans run approx. 2 min. Run engine to get temp high no fans, add ground signal to relay fans come on. Changed computer same issue, no ground command to relays, again scanner will turn on low speed no high.

2002 impala, no cooling fans. Scanner will turn on low ...

The relay that controls the fan may have been stucked close. Pull out that relay, the fan should stop. Then examine the relay. Put 12volt to it, it should click, then click again when power is removed. If relays is okay final check is the temperature sensor associated with the cooling fan. Make sure it is not shorted.
