The Ford Inline Six 250 is a 4.1L 250 cubic inch straight six-cylinder that was the optional engine available with the 1969 Ford Mustang and medium-sized Ford cars (such as the Ford Maverick) in the 1970 production year. The Inline Six 250 would become the standard engine offered by Ford with their Mustang in 1971 and was rated at the time for 155 hp.

The Inline Six 250 Ford Engine - Ford-Trucks.com

The Chevrolet inline six-cylinder engine was General Motors' basic powerplant for entry-level Chevrolet cars and trucks. It's part of a long line of straight-six engines dating to 1929 that replaced the inline-four version. The 250 made its debut in 1966 and was phased out of passenger cars in 1979 and trucks in 1984.

Create Engines CHEVROLET GM inline 6-cylinder - Long block...

With a 230-cubic-inch inline six with a mild cam, headers, and the cylinder head work we've described, you could expect to make around 250 to perhaps 260 horsepower. Because the inline six crankshaft is so long, even with 7 main bearings it's probably not a good idea to spin these engines much beyond 6,000 rpm.

Facts and Information About the Chevy Inline Six Engine

A 153 cu in (2.5 L) inline four-cylinder engine with bore and stroke identical to the 230 cu in (3.8 L) inline 6 was produced and many internal parts were common to both engines. Last optioned in 1970 with the Chevrolet Nova and the Jeep DJ-5A in North America, it is still in production as of 2018 and marketed by GM Powertrain as the Vortec ...

Chevrolet straight-6 engine - Wikipedia

The dish size was normally 6.5 cc's, however a 13 cc dish was used in California engines, which lowered the compression ratio and reduced emissions. Cylinder Bore: All 144/170ci engines have a 3.50 inch cylinder bore, while the 200/250ci have 3.68 inch cylinder bore.
