Futaba Receivers 2.4ghz & 35mhz A selection of Receivers from Futaba quality at a great price. We stock a of range of Receivers from Futaba but if you cannot find the model you are looking for here please contact us for availability and a great price.

#### ~~Futaba Receivers - Nexus Modelling Supplies~~

Transmitters can be modified in two ways. If the transmitter is fitted with an external module, normally used to switch from 35 to 40MHz, then a 2.4GHz module may be used as a 'plug in' conversion. If the transmitter is not designed for an external plug in module, then a 'hack' modification can be fitted internally, subject to space inside the transmitter case and the skills of the installer.

Futaba R7008SB Receiver (S-Bus) (HV) 2.4GHz The Futaba R7000SB is a FASSTest telemetry enabled receiver, a high-voltage design that operates up to 8 channels using the 8 standard PWM outputs or up to 18 channels (16 proportional + 2 digital) using the S-Bus port. That means a simpler setup and full support for S-Bus and S-Bus2 servos.

Have read about DIY kits for converting older non module-ized transmitters to modern 2.4GHz systems. I have an old Futaba Challenger 35Mhz 6 channel set that I inherited, so combination of that and an OrangeRX DSM DIY module at £25 seemed a good way of getting an extra transmitter out of something that is otherwise a bit obsolete.
