Photographs, drawings, and text describe over 70 projects of Italian architect Libera (1903-63), a pioneer of modern Italian architecture, who flourished during the Fascist period. Black and white. No index. First published in Italian, 1989. Annotation copyright by Book News, Inc., Portland, OR

This volume collects the proceedings of the International Seminar The Mediterranean Medina, that took place in the School of Architecture at Pescara from 17th to 19th of June 2004.

Today, nearly a century after the National Fascist Party came to power in Italy, questions about the built legacy of the regime provoke polemics among architects and scholars. Mussolini ' s government constructed thousands of new buildings across the Italian Peninsula and islands and in colonial territories. From hospitals, post offices and stadia to housing, summer camps, Fascist Party Headquarters, ceremonial spaces, roads, railways and bridges, the physical traces of the regime have a presence in nearly every Italian town. The Routledge Companion to Italian Fascist Architecture investigates what has become of the architectural and urban projects of Italian fascism, how sites have been transformed or adapted and what constitutes the meaning of these buildings and cities today. The essays include a rich array of new arguments by both senior and early career scholars from Italy and beyond. They examine the reception of fascist architecture through studies of destruction and adaptation, debates over reuse, artistic interventions and even routine daily practices, which may slowly alter collective understandings of such places. Paolo Portoghesi sheds light on the subject from his internal perspective, while Harald Bodenschatz situates Italy among period totalitarian authorities and their symbols across Europe. Section editors frame, synthesize and moderate essays that explore fascism ' s afterlife; how the physical legacy of the regime has been altered and preserved and what it means now. This critical history of interpretations of fascist-era architecture and urban projects broadens our understanding of the relationships among politics, identity, memory and place. This companion will be of interest to students and scholars in a range of fields, including Italian history, architectural history, cultural studies, visual sociology, political science and art history.

Bringing to light the debt twentieth-century modernist architects owe to the vernacular building traditions of the Mediterranean region, this book considers architectural practice and discourse from the 1920s to the 1980s. The essays here situate Mediterranean modernism in relation to concepts such as regionalism, nationalism, internationalism, critical regionalism, and postmodernism - an alternative history of the modern architecture and urbanism of a critical period in the twentieth century.

This book investigates architecture as a form of diplomacy in the context of the Second World War at six major European international and national expositions that took place between 1937 and ' 59. The volume gives a fascinating account of architecture assuming the role of the carrier of war-related messages, some of them camouflaged while others quite frank. The book provides a novel assessment of modern architecture ' s involvement with national representation it also argues that this widespread confidence in architecture ' s ability to act as a propaganda tool was one of the reasons why Modernist architecture lent itself to the service of such different masters.
