anthropological thinking has been transformed by growing interest in using anthropological knowledge to critically address practical concerns and public problems such as war, poverty, and public health. This Companion is presented in four parts. The first part looks at enduring themes—tracing the development of anthropological thinking and the current debates about themes such as witchcraft, kinship, law and justice that have demonstrated remarkable staying power in the anthropology of Africa. The second section considers topics that began to garner attention during decolonization and in its immediate aftermath. Such topics include mobility and displacement, urbanism, and political violence. The third part comprises topics such as trauma, social justice, sex and sexuality that have become the central concern of anthropologists of Africa since its many nations gained their independence.
