perspectives, theoretical, conceptual, methodological, and analytical approaches, chapters focus specifically on the question of HOW cultural factors (such as religion, history, economy, majority/minority relations, social structure, and values) shape the content, nature, and characteristics of the rhetoric that public figures utilize in selected countries in the Americas, Europe, Asia, Oceania, and the Middle East. The chapters enable comparison of the cultural effects on the different structures, styles, and contents of public speaking in societies from West to East. That is, of WHAT leaders say, HOW they say it (e.g., degree of openness, directness, usage of metaphors and slogans, xenophobic and racial expressions), under WHICH specific circumstances (e.g., National Days addresses, national or local assemblies debates, during election

campaigns appeals, press conferences briefings, and in international meetings speeches), and for WHAT specific audiences (e.g., supporters and voters, media representatives, or the global community).

Exploring speeches by public figures such as Emma Watson, Tony Blair, Donald Trump, Julia Gillard and Lady Gaga, this engaging textbook explains the ways in which political speeches can be analysed. It examines the role of language in speeches and how it can be used to challenge or reinforce prevailing social, cultural and political attitudes. Each chapter introduces a particular discourse approach and then applies this in a model analysis of a passage of text. The chosen texts concern issues of social, cultural and political importance that address topics of significant importance to the audience to

which they were delivered. Students are encouraged to engage with the text and consider how approaches to text analysis, such as cohesion, context analysis and metaphor analysis, may be adapted to provide a more critical perspective. This text will be essential reading for students of English language, linguistics, communication studies and politics on critical discourse and discourse analysis modules.
