Everyone knows that President George W. Bush is from Texas. But few of us know the role his home state plays in his presidency, and in our country. In this dual biography of man and state, Michael Lind confronts the chief crises of Bush's presidency--the economy, the Middle East, and religious fundamentalism--and traces their roots back to Texas, a state, Lind argues, that yields salient clues to the future course of our country. Widely praised as an iconoclastic and brilliant political observer, Lind, a fifth generation Texan, chronicles the ethnic clash that

produced modern Texas, the well-known plundering of the state's natural resources at the hands of its elites, and finally the deep strain of "Old Testament religiosity" which, having originated in Texas, now reaches all over the globe in the form of Bush's foreign policy. In the tradition of Gary Wills's *Reagan's America, Made in Texas* provides a wholly original cultural history that should change the way we understand not just our president, but our country.

The problem of dealing with the ongoing and constantly evolving threat of terrorism is something which continues to preoccupy governments worldwide. Has sufficient attention been paid to what happens with terrorist organizations after they change leaders? Has enough research been done on how and in what manner they are changed/replaced? This book is a collection of follow-up papers from experts who participated in the NATO Advanced Research Workshop (ARW) entitled *The Perseverance of Terrorism: Focus on Leaders*, held in 2013, and is the third in a series of outputs related to the approach to terrorist leadership. These papers are presented with the aim of further elaborating the challenges of contemporary terrorism and enriching the existing academic debate. The first two papers concentrate on how better to understand, define and analyze terrorism. The next two authors examine the relevance of contemporary terrorism, its approach and its significance as prevailing threat. The core of the debate is structured around the issue of terrorist leadership, and the majority of authors have explored this phenomenon. Seven different approaches are presented which demonstrate the importance of leadership for terrorist organizations. This book will serve as a

guidebook on several terrorism-related issues which trigger academic debate, and which must be taken into account by practitioners in their efforts to design appropriate counter-terrorist measures.

"'Harvesting Color' presents the entire process of infusing your life with color--finding the right plants, harvesting them at the best time, transforming the crop into beautiful dye, and, finally, marring pigment to fiber. In this beautiful book, Rebecca Burgess showcases thre dozen common plants that yield striking hues. Citing fascinating botanical lore, she demystifies the process of recognizing each plant in the wild. For those you can grow yourself, she details when to sow the seed and how to nuture the plant. For all the plants, you'll learn the optimal time to harvest, as well as how to extract the best dyes" --Cover flap.

Leo Fisch is a young man with a brilliant future ahead of him. He is bright, sociable and on the verge of moving in with his beautiful girlfriend, Kathryn. Outwardly, at least, he seems happy. Then when a sinister discovery is made in a forest near Leo's home town, a figure from childhood re-enters his life. David Caldwell is tough and aggressive; the very opposite of the company Leo now keeps. Unlikely friends, they are bound by a shared summer - and a shared secret - they had promised to forget. As past and present begin to close in, the comfortable life Leo has created for himself starts to unravel. Their terrible truth begins to emerge and Leo must confront not only the awkward, fragile boy he once was, but the events of that summer which threaten to destroy them both.
