Generally any real-
world problem is not
always solvable,
because in that not
only a percentage of
uncertainty is present,

but also, a certain percentage of indeterminacy is present. The presence of uncertainty has been analyzed using fuzzy logic. In this book the amount of indeterminacy is being analyzed using neutrosophic logic. Most of these models use the

concept of matrices. Matrices have certain limitation; when the models are time-dependent and any two experts opinions are being studied simultaneously, one cannot compare both of them at each stage. The new concept of bimatrices would certainly cater to these needs.A

we introduce and explore the concepts like fuzzy bimatrices, neutrosophic bimatrices and fuzzy neutrosophic bimatrices, which will find its application in fuzzy and neutrosophic logics.

In a world of chaotic alignments, traditional logic with its strict

boundaries of truth and falsity has not imbued itself with the capability of reflecting the reality. Despite various attempts to reorient logic, there has remained an essential need for an alternative system that could infuse into itself a representation of the real world. Out of this need arose the

This book gives some
new types of Fuzzy

models which can

analyze problems in a revolutionary way. The new notions of bigraphs, bimatrices and their generalizations are used to build these models which will be helpful to analyze time dependent problems or problems which need stage-by-stage comparison of more than two

Social media are increasingly revolutionising the ways in which political communication works, and their importance

for engaging citizens in politics and public affairs is well understood by political actors. This book surveys current developments in social media and politics in a range of Central and Eastern European countries, including Ukraine and Russia. It explores the process of adoption of

social media by
politicians, journalists
and civic activists,
examines the impact
of the different social
and cultural
backgrounds of the
countries studied, and
discusses specific
political situations,
such as the 2012
protests in Moscow
and the 2014
EuroMaidan events in
