The American artist Terry Winters (b 1949), known for his sensuously abstract paintings and drawings, is also a distinguished printmaker. He has explored a wide range of printing methods and techniques, including intaglio, lithography, screenprinting, woodcut, and linoleum cut, and has worked at such notable print ateliers as Universal Limited Art Editions in West Islip, New York, and the Aldo Crommelynck studio in Paris. Winters's early works, sometimes described as organic abstraction, resonate with echoes of the natural world, while his more recent prints contain layered abstract fields that address how consciousness relates to visual form. This catalogue, accompanying a retrospective exhibition of Winters's prints, will consist of a short essay, a selected bibliography, and a checklist of approximately 90 works. The prints, all from the collection of the Metropolitan Museum, will be on display from 12th June to 30th September 2001.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. The Beasts of Clawstone Castle is a fantastically spooky adventure from the author of Dial a Ghost, Eva Ibbotson. 'We need proper ghosts,' said Ned, 'really scary ones with heads that come off and daggers in their chests!' When Madlyn and her younger brother Rollo arrive at crumbling Clawstone Castle, they can see that emergency action is needed before Clawstone falls down completely. With the help of a team of homeless, scary ghosts—including a one-eyed skeleton and Brenda the Bloodstained Bride—they hatch a spooky plan to get the money rolling in. But with a sinister scientist on the loose, money might not be enough to save the mysterious beasts of Clawstone Castle. . .
