Organized thematically around important questions in comparative politics, *Introducing Comparative Politics, Fourth Edition* by Stephen Orvis and Carol Ann Drogus integrates a set of extended case studies of 11 core countries into the narrative. Serving as touchstones, the cases are set in chapters where they make the most sense topically—not separated from theory or in a separate volume—and vividly illustrate issues in cross-national context. The book's organization allows instructors flexibility and gives students a more accurate sense of comparative study. In this edition, a brand new chapter on Contentious Politics covers ethnic fragmentation, social movements, civil war, revolutions, and political violence. New case studies on this topic include the Occupy and Tea Party movements in the US; Zapatista rebellion in Mexico; Boko Haram in Nigeria; and revolutions in China and Iran. The chapter on States and Identity has been substantially revised to better introduce students to the concept of identity and how countries handle identity-based demands. Case studies include nationalism in Germany; ethnicity in Nigeria; religion in India; race in the US; gender in Iran; and sexual orientation in Brazil. Content on states and markets, political economy, globalization, and development has all been consolidated into a new Part III of the book, focusing in a sustained way on economic issues.

The most comprehensive, consistent casebook

The freshest, most contemporary introduction to comparative politics. *Essentials of Comparative Politics* introduces students to the concepts that political scientists use to study and compare political systems and the particulars of specific political systems. "Based on O'Neil, Fields, and Share's market-leading textbook and casebook, Cases and Concepts in Comparative Politics: An Integrated Approach integrates concepts and cases in one volume. Students get all of the materials in a straightforward, easy-to-use, and cost-effective way. Every conceptual chapter of the text adds robust examples from cases and connects them with just-learned concepts. The authors also integrate 13 minicases, all drawn from O'Neil, Fields, and Share's #1 selling casebook, Cases in Comparative Politics. These cases have been abridged to focus students on key concepts and thus foster better comparison between countries. This approach to integration proves seamless, logical, and easy to use" --

Introducing Comparative Politics: The Essentials is organized thematically around the essential questions in comparative politics—Who rules? What explains political behavior? Where and why? Adapted from the authors' Introducing Comparative Politics, Fourth Edition, The Essentials version offers the same framework for understanding comparative politics in a briefer format. Instructors have greater flexibility in teaching the course because this version of Stephen Orvis and Carol Ann Drogus' best-seller does not include extended case studies. Loaded with contemporary examples and up-to-date research, this streamlined text helps students engage with the critical issues shaping global politics today. KEY FEATURES: Chapter-opening key questions help you focus on the key issues as you are reading. The chapters sometimes provide conclusive answers to the key questions, but more often they show you different ways the questions can be answered or approached. Multiple "In Context" features in every chapter illustrate basic data about the chapter topics so you can set that idea into a comparative (and sometimes provocative) context. Critical Inquiry features highlight methodological issues in comparative politics, providing a gateway for empirical study and analysis. More than a hundred full color tables, figures, and maps help you visualize comparative data and better understand concepts. End-of-chapter lists of key concepts with page references are included to help you easily study and review the concepts, and a list of works cited and list of important print and electronic references offer you resources for further research.
