Chapter 21: Ethics and Morals. It is surprising how eager humanists are to separate ethics and morality. Morals seem to come from outside us. They imply someone dictated rules which I might not like, which might not suit my convenience or how I feel. And I want to be in control of this, I want to make up my own rules.

~~Chapter 21: Ethics and Morals | The Human Argument~~

The humanists created their views through the mixing of Roman and Greek beliefs and the medieval ethics which shows a "syncretism" like action of mixing ideas and an interaction of cultures/belief systems/philosophy.

Sartre's differentiation between human nature (a fixed human essence by which people are defined, whether they like it or not) and the human condition (a common set of circumstances in which people find themselves, but to which they respond in various ways) is designed to demonstrate that, for existentialists, there is still something universal about human life—and therefore that people can still be held morally accountable to others. This also clarifies the difference between Sartre's ...

In the broadest terms, it means a system of thought in which human values, interests, and dignity are considered especially important. Today, however, the meaning is more focused. The Introduction outlines seven characteristics of humanism: science and reason are invaluable tools; humanists are either atheist or agnostic; this life is the only life we have; moral values are important; we have individual moral autonomy; our lives have meaning without it being bestowed by God; and humanists ...

~~Introduction: what is humanism? — Very Short Introductions~~

Chapter 21: Human Junii is Bakugo for a bit "Welp, (Y/N), let's go meet this friend of yours." You and Sans walked peacefully towards the Ruins door, chatting and occasionally telling puns.

As a system of thought that values human needs and experiences over supernatural concerns, humanism has gained greater attention amid the rapidly shifting demographics of religious communities. This outlook has taken on global dimensions, with activists, artists, and thinkers forming a humanistic response not only to religion, but to the pressing social and political issues of the 21st century. The Oxford Handbook of Humanism aims to explore the subject by analyzing its history, its philosophical development, and its influence on culture. It will also discuss humanism as a global phenomenon—an approach that has often been neglected in more Western-focused works.

This book examines the heretofore unsuspected complexity of Lorenzo Ghiberti's sculpted representations of Old Testament narratives in his Gates of Paradise (1425–52), the second set of doors he made for the Florence Baptistery and a masterpiece of Italian Renaissance sculpture. One of the most intellectually engaged and well-read artists of his age, Ghiberti found inspiration in ancient and medieval texts, many of which he and his contacts in Florence's humanist community shared, read, and discussed. He was fascinated by the science of vision, by the functioning of nature, and, above all, by the origins and history of art. These unusually well-defined intellectual interests, reflected in his famous Commentaries, shaped his approach in the Gates. Through the selection, imaginative interpretation, and arrangement of biblical episodes, Ghiberti fashioned multi-textured narratives that explore the human condition and express his ideas on a range of social, political, artistic, and philosophical issues.

The Handbook of Humanistic Psychology is a landmark in the resurgent field of humanistic psychology and psychotherapy. Their range of topics is far-reaching—from the historical, theoretical, and methodological, to the spiritual, psychotherapeutic, and multicultural. Students and professionals are looking for the fuller, deeper, and more personal psychological orientation that this Handbook promotes.

Did the Florentine philosopher Marsilio Ficino (1433–99) influence the art of his time? This book starts with an exploration of Ficino's views on the imagination and discusses whether, how and why these ideas may have been received in Italian Renaissance works of art.

From "one of the nation's foremost Chicano literary artists" comes a coming-of-age classic and the bestselling Chicano novel

of all time that follows a young boy as he questions his faith and beliefs -- now one of PBS's "100 Great American Reads" (Denver Post). Antonio Marez is six years old when Ultima comes to stay with his family in New Mexico. She is a curandera, one who cures with herbs and magic. Under her wise wing, Tony will probe the family ties that bind and rend him, and he will discover himself in the magical secrets of the pagan past--a mythic legacy as palpable as the Catholicism of Latin America. And at each life turn there is Ultima, who delivered Tony into the world... and will nurture the birth of his soul.

The aim of this collection is to illustrate the pervasive influence of humanist rhetoric on early-modern literature and philosophy. The first half of the book focuses on the classical rules of judicial rhetoric. One chapter considers the place of these rules in Shakespeare's *The Merchant of Venice*, while two others concentrate on the technique of rhetorical redescription, pointing to its use in Machiavelli's *The Prince* as well as in several of Shakespeare's plays, notably *Coriolanus*. The second half of the book examines the humanist background to the philosophy of Thomas Hobbes. A major new essay discusses his typically humanist preoccupation with the visual presentation of his political ideas, while other chapters explore the rhetorical sources of his theory of persons and personation, thereby offering new insights into his views about citizenship, political representation, rights and obligations and the concept of the state.

The notion of 'the human' is in need of urgent redefinition. At a time of radical bio-technological developments, and in light of the political and environmental imperatives of our age, the term 'posthuman' provides an alternative. The philosophical landscape which has developed as a response to the crisis of the human, includes several movements, such as: Posthumanism, Transhumanism, Antihumanism and Object Oriented Ontology. This book explains the similarities and differences between these currents and offers a detailed examination of a number of topics that fall under the "posthuman" umbrella, including the anthropocene, artificial intelligence and the deconstruction of the human. Francesca Ferrando affords particular focus to Philosophical Posthumanism, defined as a philosophy of mediation which addresses the meaning of humanity not in separation, but in relation to technology and ecology. The posthuman shift thus emerges in the global call for social change, responsible science and multispecies coexistence.
