Charles Hoy Fort was a Dutch-American writer and researcher into anomalous phenomena. Jerome Clark writes that Fort was "essentially a satirist hugely skeptical of human beings" – especially scientists – claims to ultimate knowledge".

Charles Fort (Author of The Book of the Damned)

This is called the Fermi Paradox, proposed by Enrico Fermi in the 1950s. Fort gives a preemptive solution on page 163 , where he states, famously, 'I think we're property.'. Fort's solution is that earth was warred over in the distant past, and now is under the control of "something"--all other warned off."

"Time travel. UFOs. mysterious planets. stigmata. rock-throwing poltergeists. huge footprints. bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

A great American crank, in the best sense of the word, Charles Hoy Fort (1874-1932) spent his life hunting down reports of "anomalous phenomena"--"damned" events such rains of frogs, cattle mutilations, and UFO sightings-and studying them from a true outsider's perspective, one that characterized even objective science as wearing blinders in its approach to them. In this modern classic of analytical biography, Colin Bennett examines not only the life of this one-man investigator of real-life X-Files but his work as well, likening him to such diverse figures that loom in the cultural imagination as Lee Harvey Oswald and Shakespeare's Hamlet. A must-read for fans of the strange, this riveting book explores why the 20th century, which gave rise to conspiracy-theory philosophies and widespread distrust of social authority, embraced Fort so wholly that his name has been immortalized in the adjective "Fortean." In the course of a delightfully misspent youth, COLIN BENNETT was employed as both a musician and as a mercenary soldier. He was far better at the second than at the first. Educated at Balliol College, Oxford, he is the author of the novels Infantryman and The Entertainment Bomb, and paranormal nonfiction including Looking for Orthon, a biography of George Adamski; Politics of the Imagination, a biography of Charles Fort; and An American Demonology, about the head of the 1950s UFO-hunting agency Projcet Blue Book.

Features an introductory essay by Jack WomackLol Welcome to the worlds of Charles Fort, chronicler of the odd, the weird, the strange, the unexpected, and the inexplicable. In words at times as beautiful as anything ever written in English, Fort reveals the marvels of an age, questions the nature of what we think we know for certain, and provides the reader with leads on how not to be fooled by shaggy dog stories. Here you ll find rains of the unexpected, fish, snakes, and other items from the _super-Sargasso seaÓ of the unexplained that circles the Earth. Here are accounts of UFOs, accounts of odd animals seen at sea or on land, mysterious attacks by what appear to have been animals, mysterious appearances of things and people in places they could not be. Here Fort s epic account of spontaneous combustion, lights in the sky, poltergeists, unseen, murderous wild animals, mysterious disappearances, manifestations of psychotic mania, speaking in tongues&and, of course, the cow that gave birth to two lambs. All of this Fortean wonder is prefaced by a magnificent new introductory essay by Jack Womack, winner of the Philip K. Dick Award and lifetime Fortean. The seminal biography of the twentieth century 's premier chronicler of the paranormal, Charles Fort—a man whose very name gave rise to an adjective, fortean, to describe the unexplained. By the early 1920s, Americans were discovering that the world was a strange place. Charles Fort could demonstrate that it was even stranger than anyone suspected. Frogs fell from the sky. Blood rained from the heavens. Mysterious airships visited the Earth. Dogs talked. People disappeared. Fort asked why, but, even more vexing, he also asked why we weren 't paying attention. Here is the first fully rendered literary biography of the man who, more than any other figure, would define our idea of the anomalous and paranormal. In Charles Fort: The Man Who Invented the Supernatural, the acclaimed historian of stage magic Jim Steinmeyer goes deeply into the life of Charles Fort as he saw himself: first and foremost, a writer. At the same time, Steinmeyer tells the story of an era in which the certainties of religion and science were being turned on their heads. And of how Fort—significantly—was the first man who challenged those orthodoxies not on the grounds of some counter-fundamentalism of his own but simply for the plainest of reasons: they didn 't work. In so doing, Fort gave voice to a generation of doubters who would neither accept the " straight story " of scholastic science nor credulously embrace fantastical visions. Instead, Charles Fort demanded of his readers and admirers the most radical of human acts. Thinking.

The Fortean Collection is comprised of all five existing books by Charles Fort, THE BOOK OF THE DAMNED, NEW LANDS, LOL, WILD TALENTS, and his only novel THE OUTCAST MANUFACTURERS. The Outcast Manufacturers is the only published novel by Charles Fort. Fort wrote ten novels, though only one, The Outcast Manufacturers was published in 1909 and was later serialized in the American edition of Pearson's Magazine. Only five chapters were published in Pearson's. The Book of the Damned deals with various types of anomalous phenomena including UFOs, strange falls of both organic and inorganic materials from the sky, odd weather patterns, the possible existence of creatures generally held to be mythological, disappearances of people under strange circumstances, and many other phenomena, the book is historically considered to be the first written in the specific field of anomalistics. The title of the book referred to what he termed the "damned" data - data which had been damned, or excluded, by modern science because of its not conforming to accepted guidelines. Wild Talents recounts a wide variety of odd phenomena, Fort largely disregards his previous teleportation theory. Rather than a vague "Cosmic joker," as he postulated in his earlier books, the responsibility for these occurrences are freak powers that occur in the human mind, that cannot be naturally developed, but are there as a sort of throwback to primeval times. New Lands deals primarily with astronomical anomalies. Fort expands in this book on his theory about the Super-Sargasso Sea - a place where earthly things supposedly materialize in order to rain down on Earth - as well as developing an idea that there are continents above the skies of Earth. Lol was details a wide range of unusual phenomena. In the final chapter of the book he proposes a new cosmology that the earth is stationary in space and surrounded by a solid shell which is (in the book's final words) ." not unthinkably far away." Charles Fort's parade of scientific anomalies frames the larger anomaly that is human existence. Charles Hoy Fort was an American writer and researcher into anomalous phenomena. Today, the terms Fortean and Forteana are used to characterize various such phenomena.

The Book of the Damned, Lol, Wild Talents, New Lands. Greatest compilation of data: flying saucers, strange disappearances, inexplicable data not recognized by science. Painstakingly documented.

Nonfiction. Charles Fort collected the rejects and crackpots of science, classifying them in "real-unreal" zones: UFOs, living objects falling from the sky, phantom bullets, spontaneous combustion, showers of blood, the Super-Sargasso Sea, teleportation. Louis Kaplan brings new life to this posthum(orous) and (foot)notable thinker.

The Book of the Damned by Charles Hoy Fort An amazing book which will create the most tremendous controversy the world of Science has known for hundreds of years. Ben Hecht says in the Chicago Daily News: "For every five people who read this book four will go insane... I rush to surrender my homage. Whatever the purpose of Charles Fort, he has delighted me beyond all men who have written books in this world." "The Book of the Damned" makes fascinating reading. No imaginative fiction writer could conjure up stranger visions than Mr. Fort creates in his collection of mysterious happenings all over the world." --The New York Tribune.
