By linking people who have chronic diseases or chronic disease risk factors to community resources, CDC can help them improve their quality of life, prevent or slow down the disease, avoid complications, and reduce the need for more health care.

How We Prevent Chronic Diseases and Promote Health | CDC
Primary and community care are key settings for the effective management of long term conditions. We aimed to evaluate the pattern of health outcomes in chronic disease management interventions for adults with physical health problems implemented in primary or community care settings. The methods were based on our previous review published in 2006. We performed database searches for articles ...

COPD has negative impacts on different domains of carers' lives, such as physical health, emotional, social and financial impacts. There is a lack of intervention studies that directly support these carers and the existing interventions are focused on disease management education for patients and carers.

Impacts of COPD on family carers and supportive ...
Due to the importance that patients with chronic diseases attach to the improvement or at least the maintenance of HRQoL, the objective of this systematic review was to determine the characteristics of the interventions conducted by nurses aimed at improving the HRQoL of people over 18 years of age with chronic diseases.
