Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Part of the successful Routledge Introductions to Media and Communications series which provides concise introductions to key areas in contemporary communications, Bill Osgerby's innovative Youth Media traces the development of contemporary youth culture and its relationship with the media. From the days of diners, drive-ins and jukeboxes, to today's world of iPods and the Internet, Youth Media examines youth media in its economic, cultural and political contexts and explores: youth culture and the media the 'Fab Phenomenon': markets, money and media generation and degeneration in the media: representations, responses and 'effects' media, subculture and lifestyle global media, youth culture and identity youth and new media. Analyzing the nature of different forms of communication as well as reviewing their production and consumption, this is an essential introduction to this key area in communication and cultural studies.
