The first thing to learn is which colors are considered neutral in gardening. Neutral colors are those colors that can be used with any other color without changing the effect that you are trying to achieve. White, black, grey, silver and shades of brown are considered neutral in any arena. In gardening, green also functions as a neutral.

~~Basic Design Principles Using Color in the Garden...~~

Bright colours add drama and bring the area into the foreground. Hot colours work best in sunny gardens, and as they appear closer they make a garden feel more intimate. Calming, cool colours recede and blur the boundaries so can be used effectively to make an area feel bigger.

This color matching game is very easy set up and lets you explore lots of different natural materials for some sensory learning. Begin by using chalk to draw some color blocks on the floor. We made a kind of hopscotch grid, but circles or a rainbow are good too.

~~Outdoor learning color matching game – NurtureStore~~

Using whites, blues and pinks in a garden border echoes the way these colours associate on the colour wheel. The most difficult colours to plant together are the primary colours red, blue and yellow. Green foliage does help, but white doesn't.

~~Using Colour in the Garden | The Enduring Gardener~~

Plants are center stage when deciding on the colors in the garden, but garden colors also include existing features and structures like rocks, paving and other natural objects. Take a walk around the garden or the entire neighborhood when starting your garden color project. This will help you see the entire picture.
