An all-inclusive catalogue of the world's living diversity, *Five Kingdoms* defines and describes the major divisions, or phyla, of nature's five great kingdoms - bacteria, protocists, animals, fungi, and plants - using a modern classification scheme that is consistent with both the fossil record and molecular data. Generously illustrated and remarkably easy to follow, it not only allows

readers to sample the full range of life forms inhabiting our planet but to familiarize themselves with the taxonomic theories by which all organisms' origins and distinctive characteristics are traced and classified.

Nancy Frey and Douglas Fisher reveal how to create a failsafe assessment system that leads to purposeful lessons, clear indicators of student understanding, and forms of feedback that improve student performance. --from publisher description.

"The satisfaction of

Understanding how rainbows are formed, how ice skaters spin, or why ocean tides roll in and out—phenomena that we have all seen or experienced—is one of the best motivators available for building scientific literacy. This book attempts to make that sense of satisfaction accessible to non-science majors. Intended for use in a one-semester or two-quarter course in conceptual physics, this book is written in a narrative style, frequently using questions designed to draw the reader into a dialogue about the ideas of physics. This inclusive style allows the book to be

used by anyone interested in exploring the nature of physics and explanations of everyday physical phenomena"--

"With a focus on goal-directed, purpose-driven reading conferences, the author shows how form follows function--the structure of each conference is clearly designed to serve its purpose. Through "Researcher Spotlights" in each chapter, she'll also introduce you to a few of the teaching mentors and researchers who've had a profound influence on her work. The author describes different types of
