Norms play an important role in the functioning of the U.S. Congress. The first book-length treatment of the topic in over fifteen years, *A Social Theory of Congress* addresses what are norms, what congressional norms exist, and what effects norms have, and adds a new theoretical perspective to consider Congress.

Interest in Mathematics and Science Learning, edited by K. Ann Renninger, Martin Nieswandt, and Suzanne Hidi, is the first volume to assemble findings on the role of interest in mathematics and science learning. As the contributors illuminate across the volume's 22 chapters, interest provides a critical

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

bridge between cognition and affect in learning and development. This volume will be useful to educators, researchers, and policy makers, especially those whose focus is mathematics, science, and technology education.

"War's origins are complex: they are found in the nebulous systems of thoughts generated in cultures over time. But while reason and explication can unravel those origins - and explain why man wages war - the task of abolishing war can never be completed.

Written by leading researchers in educational and social psychology, learning science, and neuroscience, this edited volume is suitable for a wide-academic readership. It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field. It also presents cohesive descriptions concerning how motivation relates to learning, and produces a novel and insightful combination of issues and findings from studies of motivation and/or learning across the authors' collective range of scientific fields. The authors provide a variety of perspectives on motivational constructs and their measurement, which can be used by multiple and distinct scientific communities, both basic and applied.

More than fifty years ago, John Coltrane drew

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

the twelve musical notes in a circle and connected them by straight lines, forming a five-pointed star. Inspired by Einstein, Coltrane put physics and geometry at the core of his music. Physicist and jazz musician Stephon Alexander follows suit, using jazz to answer physics' most vexing questions about the past and future of the universe. Following the great minds that first drew the links between music and physics—a list including Pythagoras, Kepler, Newton, Einstein, and Rakim—The Jazz of Physics reveals that the ancient poetic idea of the Music of the Spheres," taken seriously, clarifies confounding issues in physics. The Jazz of Physics will fascinate and inspire anyone interested in the mysteries of our universe, music, and life itself.

The practice of spirit conjuration has thrived since humanity first experienced and sought to work with the natural forces of the seen and unseen worlds. It remains to this day as a living tradition among many modern cultures, while in others conjuration has been equated with 'the devil's work' or sidelined into the realm of the incredulous, viewed with superstition and disdain. Misconceptions abound, in part because the reality of spirit conjuration is often as obscured as are the spirits themselves. CONJURE CODEX breaks new ground in presenting inter-related material from a range of traditions, embracing ancient cultures, the

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

grimoires, New World traditions and others; by publishing new translations and rare texts alongside accounts of work in these traditions, and elucidations of them. In this issue is found an introduction to Betel of the Grimoire of Armadel, a treatise on the three purifying herbs of the True Grimoire, an account of Jesus Malverde, an annotated version of the Testament of Solomon, the love spells of the Petit Albert, and more.

The ERP Implementation cycle is characterized by complexity, uncertainty and a long timescale. It is about people and issues that affect the business - it is a multi-disciplinary effort. This book will provide you with the practical information you will need in relation to the many issues and events within the implementation cycle. After reading this book you will be fully equipped and alerted to what is involved in an ERP implementation. ERP (Enterprise Resource Planning) can be described as an integrated enterprise-wide information system. As well as handling many of the transactions found within a business it has the potential for meeting many of the information requirements of busy personnel. If used in the right hands, it may provide the business with a competitive edge. Much can go wrong during the implementation since there are many issues to deal with. From the content of this book you will gain an understanding of what can go wrong - you will be prepared in

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

advance, and will be equipped to take preventative steps to smooth the progress of implementation. This book: Covers the multidisciplinary subject of ERP implementation Looks at a range of relevant topics including ERP market-place development, vendor selection, project management, process design and post GoLive improvements Reveals a range of issues which an implementer should be alert to right at the outset before the go-ahead is given to proceed with an implementation Features material on vendor selection, project management, training, business process re-engineering (BPR) and continuous improvement

An exploration of how heteronormative bias is deeply embedded in the internet, hidden in algorithms, keywords, content moderation, and more. In *The Digital Closet*, Alexander Monea argues provocatively that the internet became straight by suppressing everything that is not, forcing LGBTQIA+ content into increasingly narrow channels—rendering it invisible through opaque algorithms, automated and human content moderation, warped keywords, and other strategies of digital overreach. Monea explains how the United States' thirty-year “war on porn” has brought about the over-regulation of sexual content, which, in turn, has resulted in the censorship of much nonpornographic content—including material on sex education and LGBTQIA+ activism. In this wide-ranging,

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

enlightening account, Monea examines the cultural, technological, and political conditions that put LGBTQIA+ content into the closet. Monea looks at the anti-porn activism of the alt-right, Christian conservatives, and anti-porn feminists, who became strange bedfellows in the politics of pornography; investigates the coders, code, and moderators whose work serves to reify heteronormativity; and explores the collateral damage in the ongoing war on porn—the censorship of LGBTQ+ community resources, sex education materials, art, literature, and other content that engages with sexuality but would rarely be categorized as pornography by today's community standards. Finally, he examines the internet architectures responsible for the heteronormalization of porn: Google Safe Search and the data structures of tube sites and other porn platforms. Monea reveals the porn industry's deepest, darkest secret: porn is boring. Mainstream porn is stuck in a heteronormative filter bubble, limited to the same heteronormative tropes, tagged by the same heteronormative keywords. This heteronormativity is mirrored by the algorithms meant to filter pornographic content, increasingly filtering out all LGBTQIA+ content. Everyone suffers from this forced heteronormativity of the internet—suffering, Monea suggests, that could be alleviated by queering straightness and introducing feminism to dissipate the misogyny.

This book has grown out of lesson units that have been used by the author successfully in his English classes for engineering students for over a decade. It is a continuous instructional and practice workbook that teaches communication skills that are essential in the areas of professional and technical activities. The book has taken into account the problems and requirements of technical students and is an attempt to offer sensible pedagogical solutions based on the recent developments in applied linguistics.

Financed by British spoils from eastern Maine in the War of 1812, modelled on the University of Edinburgh, and shaped by Scottish democratic education tradition, Dalhousie was unique among Nova Scotia colleges in being the only liberal, nonsectarian institution of higher learning. Except for a brief flicker of life (1838-43), for the first forty-five years no students or professors entered Dalhousie's halls a reflection in part of the intense religious loyalties embedded in Nova Scotian politics. The college building itself was at different times a cholera hospital and a Halifax community centre. Finally launched in 1863 and by 1890 embracing the disciplines of law and medicine, Dalhousie owed its driving force to the Presbyterians, retaining a double loyalty to their ethos of hard work and devotion to learning and to a board,

Acces PDF Curriculum Vitae Professor Dr Alexander Von Graevenitz

staff, and student body of mixed denominations. P.B. Waite enlivens his descriptions of the life of the university with evocative portrayals of governors, professors, and students, as well as sketches of the social and economic development of Halifax. A welcome addition to the histories of Canadian universities, this volume and its forthcoming companion, dealing with the years 1925 to 1980, contribute significantly to our knowledge of the sometimes bitter internecine struggles that accompanied the development of higher education in Canada. "Everywhere is evident the deft turn of phrase, the captivating descriptions, the beautifully drawn word pictures that do much to enliven and illuminate the story ... It possesses many strengths, including clarity and liveliness, and tells us much about Dalhousie as an institution of buildings, presidents, and professors." B. Moody, Department of History, Acadia University.
