The DT466 generates torque at a favorably low 1,300 rpm and the latest model has a governed speed of 2,400 rpm. Modern versions of the engine prove that the HEUI injection system is sophisticated enough to cope with strict emissions control requirements in the United States, although the consensus is that this mode of injection is seemingly outdated since widespread adoption of high pressure common rail technology.

[International DT466 Specs & History](#)

The 220-horsepower engine produces 540 pound-feet of torque; the 225-horsepower version produces 560 pound-feet of torque; one 245-horsepower version produces 620 pound-feet of torque and the higher-end 245-horsepower version produces 660 pound-feet of torque. The highest powered DT466 engine produces 260 horsepower and 800 pound-feet of torque.
