Ecosystem Column Lab - Montgomery County Schools

The graph indicates that the levels of nitrate in the eco-column increases over the period of the lab. Justification: If you refer to the slope of the best fit line on the graph for the nitrate levels in the eco-column, the slope is 0.08.

Online Library Ecocolumn Lab Report Questions

This is a positive slope which means that there is an increase in the nitrate in the eco-column. Explanation

Eco-Column Lab - Environmental
Science

The Aquatic Zone consisted of three guppies, a type of water plant called

Online Library Ecocolumn Lab Report Questions

elodeaa, and water. The guppies urinate, creating NH_3 , which with the help of bacteria will become NO_3 , and the NO_3 will be used by the plants as food. Along with the nitrogen cycle, the guppies help in the the carbon cycle by breathing and excreting, which is absorbed by the elodeaa to produce
