Kiva Fellow ready to explore the world! When I write this, I have just arrived in my new hometown for the next four months, Kigali, the capital of Rwanda. Slowly I am getting used to being in one place for more than two consecutive weeks after having spent the past few months travelling over three continents to twelve countries with more than 200 hours on at least forty flights.

Start your adventures in the Maya world with a trip to Mérida: the capital of Yucatán and the cultural capital of the entire peninsula. You'll visit a factory in a run-down hacienda where they're reviving the industry that made the Yucatán so rich more than 100 years ago; explore the mega-mansions lining Merida's Paseo de Mont; and go shopping for the perfect hammock and guayabera shirt.

Exploring the Mayan World | The Great Courses Plus

I utilized Scikit-Learn's CountVectorizer API to generate the bag of words. I defined a function that takes a corpora of words from the 'Variety' column and counts each n-gram's occurrence. I applied this function on the Variety column, generating unigrams with the NLTK's default stop words list.

Dell World: Exploring the school and, by proxy, office of the future Technology now allows us to envision a world of virtual offices and classrooms.

Explore far-flung countries, the highest mountains, the deepest seas, and even outer space with Explorers (working title).

Numbers surround us. Just try to make it through a day without using any. It's impossible: telephone numbers, calendars, volume settings, shoe sizes, speed limits, weights, street numbers, microwave timers, TV channels, and the list goes on and on. The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them. For instance: What timely invention was tampered with by the Caesars and almost perfected by a pope? Why did ten days vanish in September of 1752? How did Queen Victoria shorten the Sunday sermons at chapel? What important invention caused the world to be divided into time zones? What simple math problem caused the Mars Climate Orbiter to burn up in the Martian atmosphere? What common unit of measurement was originally based on the distance from the equator to the North Pole? Does water always boil at 212? Fahrenheit? What do Da Vinci's Last Supper and the Parthenon have in common? Why is a computer glitch called a "bug"? It's amazing how ten simple digits can be used in an endless number of ways to benefit man. The development of these ten digits and their many uses is the fascinating story you hold in your hands: Exploring the World of Mathematics.

Physics is a branch of science that many people consider to be too complicated to understand. In this exciting addition to the ?Exploring? series, John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students from elementary to high school can comprehend. Did you know that a feather and a lump of lead will fall at the same rate in a vacuum? Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances. Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space. Learn about the effects of inertia firsthand during fun and informative experiments. Exploring the World of Physics is a great tool for students of all ages who want to have a deeper understanding of the important and interesting ways that physics affects our lives and is complete with illustrations, chapter questions, and an index.

Discover how to find constellations like the Royal Family group or those near Orion the Hunter from season to season throughout the year How to use the Sea of Crises as your guidepost for further explorations on the moon's surface Investigate deep sky wonders, extra solar planets, and beyond as God's creation comes alive! Think you know all there is to know about our solar system? You might be surprised at some of the amazing details that you find when you begin Exploring the World of Astronomy! From the rugged surface of the moon to the distant and mysterious constellations, this book provides an exciting educational tour for students of different ages and skill levels. Learn about a blue moon, the 400-year storm on Jupiter, and what is meant by "the zone of life." Discussion ideas, questions, and research opportunities help expand this great resource on observational astronomy into an unforgettable educational course for middle school to high school students!

Tells the story of the first explorers to travel around the world and describes how and why these two epic journeys came to be made.

Chemistry is an amazing branch of science that affects us every day, yet few people realize it, or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no television, no microwave ovens, or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries and discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries, and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations, biographical information, chapter tests, and an index for easy referencing.

THE NEWEST BOOK IN OUR EXPLORING SERIES, EXPLORING THE WORLD OF BIOLOGY IS A FACINATING LOOK AT LIFE - FROM THE SMALLEST PROTEINS AND SPORES, TO THE COMPLEX LIFE SYSTEMS OF HUMANS AND ANIMALS.

It has been said that our planet is really just an insignificant speck in a vast universe, but that's not true! In fact, the conditions for life found on earth are supremely unique and make our life here comfortable. This despite the reality that the world around us is also tainted and in need of careful calibration in order to continue. This scripturally founded book opens a window to the spectacular environments found on our planet, from deserts to the tropics, with respect to creationism. Researchers and biologist Dr. Garry Parker brings his vast knowledge of ecology to a teaching setting, exploring and explaining ecosystems, population growth, habitats, adaptations, energy problems, and much more. Learn about insect control in California, why mammals have fur, and how sharks maintain "friendships" with small fish know as remora. Exploring the World Around You brings the varieties of our planet's habitats alive to the reader, and is a wonderful learning tool complete with illustrations, chapter tests, and an index.

A compelling exploration of the ways that humans have mapped the world throughout history - now in a compact new edition Map: Exploring the World brings together more than 250 fascinating examples of maps from the birth of cartography to today's cutting-edge digital maps and reflects the many reasons people make maps - to find their way, to assert ownership, to encourage settlement, or to show political power.

Online Library Exploring The World Of The Vikings

Carefully chosen by an international panel of experts and arranged to highlight thought-provoking contrasts and similarities, it features maps by the greatest names in cartography and lesser-known creators, as well as rare maps from indigenous cultures around the world.

Introduces the physical characteristics, behaviors, and family life of owls.
