Is it possible to turn inner-city horticulture into urban farming that provides solutions for the food requirements of a constantly growing world population and works at the same time as a viable business model?Urban Agriculture Europe' is the first comprehensive, interdisciplinary publication that addresses urban agriculture in Europe. Apart from well-known examples of food gardening in the midst of metropolises, it also studies activities in smaller towns, agriculture on the urban periphery, as well as experiences in eastern and southern Europe. The contributions analyze various facets of urban agriculture, from economic, spatial, and ecological aspects to questions of business chances, stakeholders' roles, and policy recommendations. Case studies from Barcelona, Milan, Sofia, Warsaw, Dublin, Lausanne, and Aachen provide a comparative study of European practice. Stakeholder's statements and a glossary of key words supplement the volume.

The aim of this IBM Redbooks publication is to provide a technical reference for IT system administrators in organizations that are considering a migration from Sun Solaris to IBM AIX 5L-based systems. This book presents a system administrator view of the technical differences that exist and the methods that are necessary to complete a successful migration to AIX 5L-based systems. This book is designed primarily as a reference for experienced Sun Solaris 8 or 9 system administrators who will be working with AIX 5L. This book is not an AIX 5L administration how-to book for system administrators who are beginners, but rather a guide for experienced administrators who have to translate a given Solaris system administration task to AIX 5L.

This book constitutes the refereed proceedings of the 15th International Symposium on Experimental Algorithms, SEA 2016, held in St. Petersburg, Russia, in June 2016. The 25 revised full papers presented were carefully reviewed and selected from 54 submissions. The main theme of the symposium is the role of experimentation and of algorithm engineering techniques in the design and evaluation of algorithms and data structures. SEA covers a wide range of topics in experimental algorithmics, bringing together researchers from algorithm engineering, mathematical programming, and combinatorial optimization communities.

Many companies, from startups to Fortune 500 companies alike, use Node.js to build performant backend services. And engineers love Node.js for its approachable API and familiar syntax. Backed by the world's largest package repository, Node's enterprise foothold is only expected to grow. In this hands-on guide, author Thomas Hunter II proves that Node.js is just as capable as traditional enterprise platforms for building services that are observable, scalable, and resilient. Intermediate to advanced Node.js developers will find themselves integrating application code with a breadth of tooling from each layer of a modern service stack. Learn why running redundant copies of the same Node.js service is necessary
Know which protocol to choose, depending on the situation
Fine-tune your application containers for use in production
Track down errors in a distributed setting to determine which service is at fault
Simplify app code and increase performance by offloading work to a reverse proxy
Build dashboards to monitor service health and throughput
Find out why so many different tools are required when operating in an enterprise environment

Adoptee-A Childhood of Torment. The true story of an adopted child, abused, beaten, taunted and humiliated. Released this week, this book reveals a very different side of the Catholic Ursuline Order of Sisters and of one of the largest Catholic churches in the Cleveland Diocese, St. Charles Catholic Church during the 1960's. Unlike the priests of the Catholic Church, the abuse of the Ursuline Sisters was not sexual but physical, mental and verbal. The author, Joseph M. Sabol, spent the first years of his life in abusive foster homes and was eventually adopted through the Catholic Charities of Cleveland Ohio. This book delves into his search for and discovery of his biological parents. His biological mother was a victim of statutory rape, by a married 28 yr. old man, yet she refused to sign away her parental rights, forcing them to put Joseph in foster care. The constant taunting of some of the kids who lived on Dorothy Avenue in Parma, Ohio eventually caused extremely violent reactions from Joseph. His propensity for violence forced an evaluation at the Cleveland Clinic for mental illness. His adoptive parents, John and Tilly Sabol lovingly took Joseph in to their home and adopted him. The struggles of raising a severely abused child proved out to be a challenging task which the Sabols refused to give up on. Joseph's adoptive mother, Tilly, demanded accountability from the nuns who added to the already abused child to the point of a physical confrontation. The values of a good Christian family and tough discipline eventually broke the cycle of violence. Joseph went on to graduate from high school, and then Penn State University with 2 degrees in Business as well as a Graduate Degree in Medicine from the Biosystems Institute for Respiratory Therapy in Phoenix Arizona. He is Board Certified by the American Medical Society. Joseph no longer practices Respiratory Therapy but enjoyed a hobby of breeding some of the best lines of Doberman Pinschers in the world. During that time, he wrote over 100 articles for E-Zine Articles and attained Platimum Expert Author status on June 4th 2008. Joseph still lives in Parma with his wife and Doberman Pinscher.
