Following the Trend: Diversified Managed Futures Trading ...

It's very far from easy to trade trend following managed futures. You will lose on up to 70% of all trades. Often you will have big losses. The day to day volatility can be severe at times. Sometimes you get periods of a year or more when you just keep losing. If you don't properly understand the nature of trend following you will not succeed.

During bull and bear markets, there is a group of hedge funds and professional traders which have been consistently outperforming traditional investment strategies for the past 30 odd years. They have shown remarkable uncorrelated performance and in the great bear market of 2008 they had record gains. These traders are highly secretive about their proprietary trading algorithms and often employ top PhDs in their research teams. Yet, it is possible to replicate their trading performance with relatively simplistic models. These traders are trend following cross asset futures managers, also known as CTAs. Many books are written about them but none explain their strategies in such detail as to enable the reader to emulate their success and create their own trend following trading business, until now. Following the Trend explains why most hopefuls fail by focusing on the wrong things, such as buy and sell rules, and teaches the truly important parts of trend following. Trading everything from the Nasdaq index and T-bills to currency crosses, platinum and live hogs, there are large gains to be made regardless of the state of the economy or stock markets. By analysing year by year trend following performance and attribution the reader will be able to build a deep understanding of what it is like to trade futures in large scale and where the real problems and opportunities lay. Written by experienced hedge fund manager Andreas Clenow, this book provides a comprehensive insight into the strategies behind the booming trend following futures industry from the perspective of a market participant. The strategies behind the success of this industry are explained in great detail, including complete trading rules and instructions for how to replicate the performance of successful hedge funds. You are in for a potentially highly profitable roller coaster ride with this hard and honest look at the positive as well as the negative sides of trend following.

SUPERANNO In this fully updated edition, trend following expert Michael Covel introduces the traders and fund managers who have been using this strategy for decades, adding brand-new profiles such as David Harding, who manages \$10 billion plus dollars through his London-based trend following firm. Then, Covel walks you through all the concepts and techniques you need to use trend following yourself. One step at a time, one simple chart at a time, you'll learn how to understand price movements well enough to profit from them consistently--in any market. Original.

Beating the stock market isn't very difficult. Yet almost all mutual funds consistently fail. Hedge fund manager Andreas F. Clenow takes you behind the scenes to show you why this is the case and how anyone can beat the mutual funds. Momentum investing has been one of very few ways of consistently beating the markets. This book offers you a unique back stage pass, guiding you through how established hedge funds achieve their results. The stock markets are widely misunderstood. Buying and selling stocks seems so simple. We all know what stocks are and what the companies produce. We're told that stocks always go up in the long run and that everyone should be in the stock markets. Oversimplifications like that can end up costing you. In the long run, the major stock indexes show a performance of five to six percent per year. For that return, you will have to bear occasional losses of over half your capital and be forced to wait many years to recover your money. Yes, in the long run stocks do go up. But the story isn't that simple. Stocks on the Move outlines a rational way to invest in the markets for the long term. It will walk you through the problems of the stock markets and how to address them. It will explain how to achieve twice the return of the stock markets at considerably lower risk. All rules and all details will be explained in this book, allowing anyone to replicate the strategies and research. Andreas F. Clenow is the chief investment officer and partner of ACIES Asset Management, based in Zurich, Switzerland. Starting out as a successful IT entrepreneur in the 90s boom, he enjoyed a stellar career as global head of equity and commodity quant modeling for Reuters before leaving for the hedge fund world. Having founded and managed multiple hedge funds, Mr. Clenow is now overseeing asset management and trading across all asset classes. He is the author of best-selling and critically acclaimed book Following the Trend and can be reached via his popular website www.FollowingTheTrend.com.

"We're going to raise traders just like they raise turtles in Singapore." So trading guru Richard Dennis reportedly said to his long-time friend William Eckhardt nearly 25 years ago. What started as a bet about whether great traders were born or made became a legendary trading experiment that, until now, has never been told in its entirety. Way of the Turtle reveals, for the first time, the reasons for the success of the secretive trading system used by the group known as the "Turtles." Top-earning Turtle Curtis Faith lays bare the entire experiment, explaining how it was possible for Dennis and Eckhardt to recruit 23 ordinary people from all walks of life and train them to be extraordinary traders in just two weeks. Only nineteen years old at the time-the youngest Turtle by far-Faith traded the largest account, making more than \$30 million in just over four years. He takes you behind the scenes of the Turtle selection process and behind closed doors where the Turtles learned the lucrative trading strategies that enabled them to earn an average return of over 80 percent per year and profits of more than \$100 million. You'll discover How the Turtles made money-the principles that guided their trading and the step-by-step methods they followed Why, even though they used the same approach, some Turtles were more successful than others How to look beyond the rules as the Turtles implemented them to find core strategies that work for any tradable market How to apply the Turtle Way to your own trades-and in your own life Ways to diversify your trading and limit your exposure to risk Offering his unique perspective on the experience, Faith explains why the Turtle Way works in modern markets, and shares hard-earned wisdom on taking risks, choosing your own path, and learning from your mistakes.

Systematic trading allows you to test and evaluate your trading ideas before risking your money. By formulating trading ideas as concrete rules, you can evaluate past performance and draw conclusions about the viability of your trading plan. Following systematic rules provides a consistent approach where you will have some degree of predictability of returns, and perhaps more importantly, it takes emotions and second guessing out of the equation. From the onset, getting started with professional grade development and backtesting of systematic strategies can seem daunting. Many resort to simplified software which will limit your potential. Trading Evolved will guide you all the way, from getting started with the industry standard Python language, to setting up a professional backtesting environment of your own. The book will explain multiple trading strategies in detail, with full source code, to get you well on the path to becoming a professional systematic trader. This is a highly practical book, where every aspect is explained, all source code shown and no holds barred. Written by Andreas F. Clenow, author of the international best sellers Following the Trend and Stocks on the Move, Trading Evolved goes into greater depth and covers strategies for trading both futures and equities. "Trading Evolved is an incredible resource for aspiring quants. Clenow does an excellent job making complex subjects easy to access and understand. Bravo." -- Wes Gray, PhD, CEO Alpha Architect

Master the Low-Risk ETF-Based Investing Strategy That Gives You the Chance to Make Money in Any Market Climate "Tom Lydon has been a leader in the ETF business for many years.
