Gateway is an academically rich, multi-level general English course designed to lead teenage students to success in school-leaving/university entrance examinations, and prepare them for university and the world of work.

When a group of outcasts with extraordinary abilities comes out of hiding, their clash with a violent society will spark a revolution—or an apocalypse. “Much like the X-Men comics, Proehl masterfully uses science fiction as a lens to examine social inequality and human evil.”—Booklist Avi Hirsch has always known his daughter was different. But when others with incredible, otherworldly gifts reveal themselves to the world, Avi realizes that her oddness is something more—that she is something more. With this, he has a terrifying revelation: Emmeline is now entering a society where her unique abilities unfairly mark her as a potential threat. And even though he is her father, Avi cannot keep her safe forever. Emmeline soon meets others just like her: Carrie Norris, a teenage girl who can turn invisible . . . but just

wants to be seen. Fahima Deeb, a woman with an uncanny knack for machinery . . . but it's her Muslim faith that makes the U.S. government suspicious of her. They are the nobody people—ordinary individuals with extraordinary gifts who want one only thing: to live as equals in an America that is gripped by fear and hatred. But the government is passing discriminatory laws. Violent mobs are taking to the streets. And one of their own—an angry young man seething with self-loathing—has used his power in an act of mass violence that has put a new target on the community. The nobody people must now stand together and fight for their future, or risk falling apart. The first book of a timely two-part series, *The Nobody People* is a powerful novel of love and hope in the face of bigotry that uses a world touched by the fantastic to explore our current reality. It is a story of family and community. It is a story of continuing to fight for one another, no matter the odds. It is the story of us. Bob Proehl will return with *The Somebody People*!

Destination B2: Grammar and Vocabulary is the ideal grammar and vocabulary practice book for all students preparing to take any B2 level exam: e.g. Cambridge FCE.

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Gateway is an academically rich five-level course designed to lead teenage students to success in school-leaving and university entrance exams and prepare them for university and the world of work.

Wangari Maathai, founder of The Green Belt Movement, tells its story including the philosophy behind it, its challenges, and objectives.

Helps students prepare and practise for their school-leaving exams and equips them with lifelong learning and study skills. Taking an inductive approach to Grammar, this title revises and extends the students' knowledge of grammar and vocabulary through varied skills-based activities that recycle, revise, evaluate and develop language skills.

In this remarkable anthology, introduced and edited by Ilya Kaminsky and Susan Harris, poetic visions from the twentieth century will be reinforced and in many ways revised. Here, alongside renowned masters, are internationally celebrated poets who have rarely, if ever, been translated into English.
