The New World Information and Communication Order is a term coined in a debate over media representations of the developing world in UNESCO in the late 1970s early 1980s. The NWICO movement was part of a broader effort to formally tackle global economic inequality that was viewed as a legacy of imperialism upon the global south. The term was widely used by the MacBride Commission, a UNESCO panel chaired by Nobel Peace Prize laureate Seán MacBride, which was charged with creation of a set of ...

The concept of a global information society is one of the most discussed and misunderstood \Big Ideas\ of our time. While we've made gigantic strides toward connecting the world through information and communication technologies (ICTs), we have not attained that goal.

A global information society: are we there yet?
The study of global communication is an interdisciplinary field focusing on global communication, or the ways that people connect, share, relate and mobilize across geographic, political, economic, social and cultural divides. Global communication implies a transfer of knowledge and ideas from centers of power to peripheries and the imposition of a new intercultural hegemony by means of the "soft power" of global news and entertainment.
