Memorandum

November 2012

This book offers a
critical exploration
of definitions,
methodologies and
ideologies of

Access Free

Grade 11

English-medium instruction (EMI), contributing to new understandings of translanguaging as theory and pedagogy across diverse contexts. It brings together a number of conceptual and empirical studies on translanguaging in EMI at different

Access Free

Grade 11

educational levels,
in a variety of
countries, with
different

approaches to
translanguaging,
different named
languages, and
different policies.

These studies
include several
underrepresented
contexts across the
globe, providing a

Grade 11

broad view of how
translanguaging in
EMI is understood
in these

educational
settings.

Furthermore, this
book addresses the
complexities of
translanguaging
through a
discussion of the
affordances and
constraints

November 2012

South Africa has
done well to
systematically
expand its
educational system
and to lengthen the
schooling
experience of

Access Free

Grade 11

Successive learner cohorts. But the quality of the output from the school system has been questioned. In seeking to identify the reasons for this, it is important to relate educational outputs (competencies, as measured for

Access Free

Grade 11

instance by
examinations or
standardized tests)
to inputs.

Determining the
relative
contributions of the
inputs - of the
school, the
household and the
individual learner -
to educational
outputs is not
straightforward,

Access Free

Grade 11

particularly since
very little
educational
production function
analysis has been
undertaken in
South Africa. Until
recently, no South
African school data
has incorporated
test results, school
characteristics and
information on the
household

Access Free

Grade 11

circumstances of individual learners necessary for this kind of analysis.

However, the results from a survey of a sample of schools involved in the large-scale Quality Learning Project (QLP), funded by the Business Trust, have yielded such

Access Free

Grade 11

data. The QLP data set offers a new analytical opportunity to address the question: What are the effects of social and economic variables on educational outcomes in the QLP schools?

All over the world,

Access Free

Grade 11

Economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be

Access Free

Grade 11

unexpectedly
difficult. Access to
education has
increased, but
quality remains
low, with
weaknesses in
governance
comprising an
important part of
the explanation.
The Politics and
Governance of
Basic Education

Access Free

Grade 11

explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition

Access Free

Grade 11

from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an

Access Free

innovative alternative strategy
for making process,
combining practical
steps to achieve
incremental gains
to re-orient the
system towards

This monograph reports on South Africa's performance in TIMSS 2003 relative to 50 other countries; describes the performance of different groups of learners in South Africa; and provides contextual

information about
teachers, schools
and the curriculum.

The report
concludes with
recommendations
for strategic
interventions to
improve South
African learners'
performance in
mathematics and

findings contained

in this report offer valuable insights to academics, policymakers, curriculum-planners and teachers and those involved in the development of education in South Africa.

Indeed, since the end of apartheid in 1994 South Africa has become a major diplomatic player both on the African continent as well as further afield. Despite the size of South Africa's economy, the country

Access Free

Grade 11

currently faces a number of major economic challenges. As of the end of July 2014 the unemployment rate was at 25.5%, according to data from Statistics South Africa, which was among the highest in the world. While the

Access Free

Grade 11

government's long-term development plans are generally highly regarded, delivery and execution has occasionally been problematic. While there are major hurdles that must be cleared, given the country's strong institutions and the rapid pace

Access Free

Grade 11

of economic expansion over the past two decades, South Africa should be able to look forward to 20 more years of peace and steady, sustained economic growth.

This report is an integration of the seven reports which emerged

Access Free

Grade 11

from the research,
and pulls together
the findings arising
from it. What

emerges is that the
resignation, death
and ageing of the
present educator
force is likely to
have a significant
effect on

replacement
demand for
educators over the

next four years.
