Douglas Llewellyn focuses on teaching science through an inquiry-based process, showing teachers how to implement inquiry using the three "Rs" of inquiry—restructuring, retooling, and reculturing. Inquire Within helps teachers design inquiries for their students and also provides ready-to-use inquiry lessons. Updates to the Third Edition include: Alignment with the new Common Core State Standards and the Next Generation Science Standards A central focus on making and defending scientific arguments (i.e. argumentation) Guidance on developing the prerequisite attitude and mindset for becoming an inquiry- and argument-based teacher How to balance the meaning (the disposition) as well as the mechanics (the how-to) of inquiry and argumentation Background on self-directed learning Practice in climbing the ladder of professional improvement Many new vignettes of inquiry and argument-based activities that integrate language arts with science. New sections tie inquiry-based instruction to classroom management, language literacy, the nature of science, multiple intelligence, communication skills, and scientific argumentation. The Third Edition is now closely aligned with Teaching High School Science Through Inquiry and Argumentation

In So What Do They Really Know? Cris Tovani explores the complex issue of monitoring, assessing, and grading students' thinking and performance with fairness and fidelity. Like all teachers, Cris struggles to balance her student-centered instruction with school system mandates. Her recommendations are realistic and practical: she understands that what isn't manageable isn't sustainable. Cris describes the systems and structure she uses in her own classroom and shows teachers how to use assessments to monitor student growth and provide targeted feedback that enables students to master content goals. She also shares ways to bring students into the assessment cycle so they can monitor their own learning, maximizing motivation and engagement. So What Do They Really Know? includes a wealth of information: Lessons from Cris's classroom Templates showing how teachers can use the workshop model to assess and differentiate instruction Student work, including samples from linguistically diverse learners, struggling readers, and college-bound seniors Anchor charts of student thinking Ideas on how to give feedback Guidelines that explain how conferring is different from monitoring Suggestions for assessing learning and differentiating instruction during conferences Advice for managing ongoing assessment Cris's willingness to share her own struggles continues to be a hallmark of her work. Teachers will recognize their own students and the challenges they face as they join Cris on the journey to figure out how to raise student achievement.
