Blueprint for an Escort Service is written with legal issues in mind, but from a business perspective. The idea is to send out sexy escorts or dancers/strippers by the hour, and not for sex. If opening an escort business or entertainment company is your plan, this book will save you unimaginable trouble and avert potential disasters at every corner. This book was updated in February 2012. You are receiving the benefit of my 13 years of experience in the escort business, and the 13 years does not include several years of knowledge developed from the arrest, case, and trial that resulted in my acquittal by jury. If you are going to read advice and operational plans in relation to the escort business, don't you want that advice to come from the one escort service owner in the US that beat racketeering and conspiracy charges? This book is written for those people that suddenly find that they're on the verge of poverty and have the desire, audacity, and guts to dig their way out of that hole. It is also written for the wage slave that wants to live for a change, or the single mother that wants to spend time with her children, not working 50 hours a week for nothing. It could also be for the person with health problems that can't go out and do physical work, or for the reader that simply wants to know about escort business operations. Adult business is what you make it, and it certainly can be fun, exciting, and profitable all at the same time. It is a potential solution to financial problems. The entire point of the book is to make opening an escort service or entertainment company anywhere a simple project. Some chapters are short as it is not my intention to reinvent the wheel. The word count total is 33,860.

Richard Hooker's Of the Laws of Ecclesiastical Polity has long been acknowledged as an influential philosophical, theological and literary text. While scholars have commonly noted the presence of participatory language in selected passages of Hooker's Laws, Paul Anthony Dominiak is the first to trace how participation lends a sense of system and coherency across the whole work. Dominiak analyses how Hooker uses an architectural framework of 'participation in God' to build a cohesive vision of the Elizabethan Church as the most fitting way to reconcile and lead English believers to the shared participation of God. First exploring Hooker's metaphysical architecture of participation in his accounts of law and the sacraments, Dominiak then traces how this architecture structures cognitive participation in God, as well as Hooker's political vision of the Church and Commonwealth. The volume culminates with a summary of how Hooker provides a salutary resource for modern ecumenical dialogue and contemporary political retrievals of participation.

This specialist work in historical theology deals with the doctrine of salvation in the early theology of Richard Hooker (1554-1600) from the perspective of the concept of faith and with Hooker's connections to the early English Reformers (W. Tyndale, J. Frith, R. Barnes, T. Cranmer, J. Bradford and J. Foxe) in crucial teachings such as justification, sanctification, glorification, election, reprobation, the sovereignty of God, and salvation of Catholics. The study proves that Hooker's theology is firstly Protestant (to counter the views which picture it as Catholic) and secondly Calvinist.

An "essence outline" of the eight books Of the Laws of Ecclesiastical Polity. Every section of the John Keble 1836 edition has been distilled to its core ideas. The text maintains some of the flavor of Mr. Hooker's prose, while making the ideas clear.

Interrogating supply/demand from an inter- and multi-disciplinary perspective, this collection broadens engagement beyond the routine analysis of the locus of violence in prostitution and the validity of the prostitute's consent. A focus on the supply/demand dynamic brings into play a range of other societal, economic and psychological factors such as the social construction of sexuality, the viability of alternative choices for prostitutes and clients, and the impact of regulatory regimes on the provision of sexual services. The factors which underlie each component of the supply/demand dyad are also studied and an examination is made of their dynamic interrelation. The collection emphasizes the importance of rendering policy makers alert to the evidence emerging from empirical studies conducted in different fields of enquiry, in the hope of moving beyond polarity and politics at the local, national and international level.

This book advances debates over the relationship between care and economy through the concept of intimate labor—care, domestic, and sex work—and thus charts relations of race, class, gender, sexuality, and citizenship in the context of global economic transformations.

Richard Hooker (1554-1600) is often credited with being the founding father of Anglican moral theology. This book is the first major study to examine in depth the extent to which this claim is justified, and to evaluate the nature of Hooker's contribution to this aspect of Anglican tradition. The study roots Hooker firmly within his own historical context and considers his text principally on its own terms; thus it avoids many of the problems that have bedevilled modern Hooker scholarship, particularly where attempts have been made to 'claim' him for one particular theological tradition over another, or to approach his work primarily with an eye to its continued relevance to contemporary debate within Anglicanism, both of which can lead to significant distortions in the way in which Hooker is read and interpreted. What emerges amounts to a significant re-evaluation of much of the conventional wisdom about Hooker's place within Anglicanism, as well as a range of original insights into the nature, content, and style of his work and its wider significance.
