How To Replace Rear Brake Shoes 1995-2010 Toyota Corolla*How To Fix Brakes On*

Step 1. Check the brake pads. The first thing you will need to know is if the brake pads are too worn to work effectively. There should be at least 1/4 inch (0.6 cm) of rubber (the brake pad) between the clamp and the tire when the caliper is engaged to brake the bike. If the pads are worn out, you will need to replace them.[1] X Research sourceStep 2. Check the cables. Squeeze the brake handles and make sure the cable moves. If it does not, your cable may be stuck in the cable housing, or ...
