From background information on the technology itself to layout wiring; taking in decoders, hand controllers, wireless and many practical modelling projects, Neil Burkin offers a comprehensive introduction to Digital Command Control (DCC) for the beginner and experienced modeller alike.The book emphasises the benefits of DCC technology as a model railway control system and offers practical advice on the choice of systems, applying the technology to a layout, how to use it to enhance layout operations, and how it can be used to overcome practical difficulties with operations such as banking, double-heading, lighting and sound. Technical jargon is avoided and clear descriptions of each project featured in the book will remove the mystery surrounding DCC. Many of the modelling projects may be adapted for almost any modelling situation and are supported by over 400 excellent colour photographs. A comprehensive guide to Digital Command Control for the beginner and experienced modeller alike. Emphasises the benefits of DCC technology and offers practical advice on the choice of sytems. Includes practical modelling projects which are supported by over 400 excellent colour photographs. Nigel Burkin is a railway modeller with over 20 years' experience and has hundreds of magazine articles to his credit.

Laxton's gives you access to the most reliable and current data. All 250,000 price elements have been individually checked and updated for the 2002 edition so that your estimates are always accurate and cost competitive. Laxton's makes analytical estimating simple and straightforward by displaying a complete breakdown for all measured items under 10 separate headings, all on a single page. This shows you a complete price build-up at a glance - and gives you the option to make price adjustments wherever necessary. You can find the sections you need quickly and easily, via the special marker system on the front cover and page edges. The free CD with this price book contains Masterbill's ESTIMATOR software and fully resourced data on all the price elements in Laxtons. Not only does the CD offer fast and efficient pricing at the touch of a button, it gives details of all the resources required to do the job. Laxton's approximate estimating section gives all in pricing for quick reference on the cost of composite items such as floors helping you calculate the cost implications of using plywood sheeting rather than softwood boarding, for example. Laxton's Basic Price section gives you a quick price on hundreds of items - from concrete work to roofing materials - to save you going through hundreds of lists from suppliers, manufacturers and building merchants. Laxton's Brand and Trade Names section lists over 12,000 brands and trade names and company addresses to help you locate specific items.
