IT management is the discipline whereby all of the information technology resources of a firm are managed in accordance with its needs and priorities. These resources may include tangible investments like computer hardware, software, data, networks and data centre facilities, as well as the staff who are hired to maintain them. Managing this responsibility within a company entails many of the basic management functions, like budgeting, staffing, change management, and organizing and controlling,

Information technology management - Wikipedia

The integration of health information technology (IT) into primary care includes a variety of electronic methods that are used to manage information about people's health and health care, for both individual patients and groups of patients. The use of health IT can improve the quality of care, even as it makes health care more cost effective.
