The Dai Nippon Iaido Kyokai was founded by Shimojo sensei to share his knowledge of Japanese Budo to all whom wish to learn and have the correct mind and spirit to study the arts.

The comic books that came out in the 1920s to get Americans to read more comprised of many action- and super heroes, such as Batman Superman, and Wonder Woman. Since 1968 Bruce Lee playing Kato and the Green Hornet, in 1973 the movie, Enter the Dragon will introduce Asian martial arts to the USA and the world. This book will show the superhuman feats of the Japanese archers psychologically and physically, and the records they achieved, in my opinion. These unsung people would be heroes today if more readers knew of these records that the Japanese have in their history. The impact of the mental and physical is so

extreme that this information hopefully will garner THE WOW FACTOR!

This book is a must for everyone who is interested in martial arts. It handles a great variety of techniques besides history and philosophy. The technical versatility of Ju-jutsu can be clearly seen in the contents of this book(see preview).With 428 pages and over 1500 photo's it can be classified as a complete all-round book. Edgar Kruyning is a leading authority on what remains of Minoru Mochizuki's teachings today.

If the Way of the warrior is the soul of Japan, their magnificent swords were the tools utilized to form the nation and forge their spirit. You'll find an abundance of information in this special anthology in support of this thesis. Kimberley Taylor wrote four chapters, the first being an interview with 7th-dan Matsuo Haruna. Haruna offers great advice for practitioners based on his first-hand experience. Taylor's two highly researched chapters give overviews of two major iaido schools. Excellent photos and descriptions of katas accompany the text. Taylor's finale is a short piece describing two of his favorite techniques, while Deborah Klens-Bigman's chapter deals with two of her favorite techniques. Another top ranking swordsman, Nicklaus Suino, gets to the finicky details of sword-drawing techniques as performed by masters. From his two chapters, we learn how to watch for telltale signs of expertise and come to a greater appreciation of the art of drawing the sword. Jonathan Seckler's chapter translates and comments on an essay written by Chozanishi Shissai in 1729. He argues that Neo-Confucianism rather than Zen became the foundation of swordsmanship, and illustrates how the sword arts began to be appreciated for their use for self-development. Andrew Bryant's chapter focuses on poems passed down within the Muso Jikiden Eishin-ryu School of Iaido. These poems correspond to techniques contained within the system created in the 17th century. The author presents each poem and offers provides textual descriptions of their corresponding applications with each sword technique illustrated. Joseph Svinth's research presents the earliest kendo clubs to form in Canada. The socio-cultural settings add much flavor to this chapter. Information is provided regarding notable instructors, training, and competitions. Another way to better understand a martial tradition of one country is to compare it with another. Matthew Galas compares and contrasts sword arts in Germany with the Japanese traditions. The focus is on general principles and combat philosophy. Devotees to sword practice are well aware that scabbards get damaged. Michael Babin's chapter shows "how to" build a serviceable scabbard according talents of anyone moderately handy with tools. The twelve chapters described above should inspire further research and practice in the Japanese sword arts, plus bring a greater

appreciation for their unique place in world history and culture.
