Thriller. Murder trial juror Lucy Lowell turns to Dr. Alex Delaware, hero of *'Bad Love'*, when she thinks someone is following her. Then her brother is murdered. Who is threatening her? And how can it be linked to the trial?

“Fascinating....Fast-paced and dynamic.” —Dallas Morning News “Kellerman is taking a big risk here, and I think she pulls it off in fine style.”  
—Washington Post With Moon Music, New York Times bestseller Faye Kellerman leaves Los Angeles and heads to stranger territories: “Sin City” Las Vegas, Nevada. Taking a brief hiatus from her mystery series featuring LAPD Homicide Detective Peter Decker and his Orthodox Jewish wife, Rina Lazarus, Kellerman delivers a masterful stand-alone crime novel that crackles with suspense and tantalizes with a touch of the paranormal. The horribly savaged body of a once-beautiful Vegas showgirl is discovered in the desert not far from the world-famous Strip, plunging Detective Sergeant Romulus Poe into the heart of a bizarre, full moon-soaked mystery that could cost him everything he holds dear in life, including his sanity.

Detective Peter Decker and Rina Lazarus return to Los Angeles when a kidnapping hits close to home—in this breathtaking new thriller from New York Times bestselling author Faye Kellerman. Peter and his partner, Detective Tyler McAdams, are thrown into an unsolved case and propelled into action when a body is found in the very woods where a man previously went missing in upstate New York. But that’s not the only crisis that Peter has to deal with. Teresa McLaughlin, the biological mother of Peter and his wife Rina’s foster son, Gabe, has fled to Los Angeles with her two children in tow, hoping to avoid a court injunction amid a messy divorce. But LA is no escape from her problems—she is found by ruthless men and beaten mercilessly. When she wakes, barely conscious, Teresa discovers that both of her children are gone and frantically calls Gabe for help. With his mother on the verge of death, Gabe contacts Peter and Rina, as well as his biological father, the notorious Christopher Donatti, a former hit man from a known criminal family who’s now a millionaire in Nevada. By bringing Donatti into the fray, Gabe, Peter, and Rina know they have made a deal with the devil—but they may not be able

to recover the kids without him. As these unlikely allies rally to find the kidnappers before things end tragically, they race headlong toward an explosive confrontation from which no one will emerge unscathed...

**#1 NEW YORK TIMES BESTSELLER** • The extraordinary true story of four men who take the law into their own hands. This is the story of four young boys. Four lifelong friends. Intelligent, fun-loving, wise beyond their years, they are inseparable. Their potential is unlimited, but they are content to live within the closed world of New York City's Hell's Kitchen. And to play as many pranks as they can on the denizens of the street. They never get caught. And they know they never will. Until one disastrous summer afternoon. On that day, what begins as a harmless scheme goes horrible wrong. And the four find themselves facing a year's imprisonment in the Wilkinson Home for Boys. The oldest of them is fifteen, the youngest twelve. What happens to them over the course of that year—brutal beatings, unimaginable humiliation—will change their lives forever. Years later, one has become a lawyer. One a reporter. And two have grown up to be murderers, professional hit men. For all of them, the pain and fear of Wilkinson still rages within. Only one thing can erase it. Revenge. To exact it, they will twist the legal system. Commandeer the courtroom for their agenda. Use the wiles they observed on the streets, the violence they learned at Wilkinson. If they get caught this time, they only have one thing left to lose: their lives. Praise for *Sleepers* “Undeniably powerful, an enormously affecting and intensely human story . . . *Sleepers* is a thriller, to be sure, but it is equally a wistful hymn to another age.”—The Washington Post Book World “A powerful book, hard to forget . . . Carcaterra is an excellent writer, changing pace here and there but never letting the reader go. . . . Sensitive, humorous, and harrowing, featuring dialogue with perfect pitch.”—The Denver Post “A gut-wrenching piece of work . . . [Lorenzo] Carcaterra's graphic narrative grips like gunfire in a dark alley.”—The Atlanta Journal-Constitution “A terrifying account of brutality and retribution, searing in its emotional truth, peopled with murderers, sadists, and thugs, but biblical in its passion and scope.”—People

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One

hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
