Principles of Management Accounting 2nd edition is an accessible, entry-level management accounting textbook for university students aimed at second- and third-year students at universities and universities of technology, as well as those following MBA courses in accounting and finance. The book covers undergraduate-appropriate topics from the management accounting syllabus of the South African Institute of Chartered Accountants (SAICA). In doing so, most aspects of the relevant papers' syllabi of the Chartered Institute of Management Accountants (CIMA), as well as those of the Association of Chartered Certified Accountants (ACCA) are dealt with too. The contributors are from a range of South African tertiary institutions ensuring that the book is representative of the way management accounting is taught in the country and taking cognizance of the areas in which students have difficulty.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

This international best-seller provides a clear and accessible introduction to cost and management accounting. Colin Drury's renowned authoring expertise blends theory and practice and the text encompasses all the basic topics needed on an introductory course. Now in its seventh edition, Cost and Management Accounting has been carefully updated to ensure it precisely fits the latest course and examination requirements. New to this edition: new and revised Real World View mini case studies; thorough stylistic overhaul to offer greater clarity and accessibility; and, all theory and applications fully revised and updated throughout.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

Most students, regardless of their major, need to understand information systems and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need to understand to be successful in the business world. Introduction to Business Information Systems, Third Canadian Edition by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of business value and outlines innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value. Introduction to Business Information Systems, Third Canadian Edition is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the Tech Guides.

Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.

Money Talks explores the ways the financial concepts of money and capital are understood and talked about by a range of people, from traders to ordinary investors, and how these accounts are framed and represented across a range of media. This collection brings together leading writers and emerging researchers to demonstrate how work in media and cultural studies can contribute to debates around the meanings of money, the operations of capital, and the nature of the current crisis. Drawing on a range of work from across disciplines, Money Talks offers a provocative and path-breaking demonstration of the value of incorporating approaches from media and cultural studies into an understanding of economic issues.
