How do technology and organization interact to shape organizational structures and processes? What organizational, political and social processes constrain technological development? What forces shape the articulation of organizational and technological systems? Answering these and other pivotal questions, this volume centres on the role of theory for advancing our knowledge of communication technology in organizations at several levels - micro, group and macro. The distinguished contributors examine richly diverse topics, including telecommunications, communication networks and new media, the use of group decision support systems and discretionary databases.

Communication in organizations has changed drastically since the release of the first edition of this bestselling textbook. This fully revised and updated edition delves into state-of-the-art studies, providing fresh insights into the challenges that organizations face today. Yet this foundational resource remains a cornerstone in the examination of classic research and theory in organization communication.

Providing a practical and step-by-step guide to collecting and and managing qualitative data, this book focuses on the three most often used forms of qualitative methods: participant observation, in-depth interviews, and focus groups. Designed to be very applied, this textbook includes many checklists and tips for how to use each technique while doing research. It also includes numerous real-life examples and cases so that the reader will benefit from seeing the broader picture. Collecting Qualitative Data: A Field Manual is intended both for beginning researchers and the more experienced research collector.

"Collections: A Journal for Museum and Archives Professionals" is a multi-disciplinary peer-reviewed journal dedicated to the discussion of all aspects of handling, preserving, researching, and organizing collections. Curators, archivists, collections managers, preparators, registrars, educators, students, and others contribute.

Edited by leading authorities on nonverbal behavior, this book examines state-of-the-art research and knowledge regarding nonverbal behavior and applies that scientific knowledge to a broad range of fields. It presents a true scientist-practitioner model, blending cutting-edge behavioral science with real-world practical experience. Part I provides up-to-date reviews of scientific knowledge concerning facial expressions, voice, body and gesture, cultural influences on nonverbal behavior, and deception. In Part II, experienced practitioners describe how they use nonverbal communication in their work to improve accuracy and proficiency. This book is a valuable resource for students, practitioners, and professionals to discover the science behind the practice and to see how other professionals have incorporated nonverbal communication into practice.

The Second Edition of Case Studies in Organizational Communication: Ethical Perspectives and Practices, by Dr. Steve May, integrates ethical theory and practice to help strengthen readers' awareness, judgment, and action in organizations by exploring ethical dilemmas in a diverse range of well-known business cases.

The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

With opinion surveys being used increasingly to measure the public response to governmental initiatives, this book that helps clarify the basics of survey research as they apply to public administration will be welcomed. It is organized around the fundamental stages of the research process - planning, design, implementation, analysis and presentation of data. David H Folz presents practical illustrations and does not assume the reader to have an extensive background in statistics. Thorough coverage of the use of computers in data analysis is provided, together with illustrations of SPSS screens.
