Waves, Sound, and Light

Speed (s) is equal to the distance (d) something travels

Online Library Mcgraw Hill Waves Sound Light Answer

divided by the time (t) it takes to cover that distance: $s = \frac{d}{t}$.
You can use this equation to calculate the speed of sound waves. For example, if a sound wave travels a distance of 662 meters in 2 seconds in air, its speed is: $s = \frac{d}{t} = \frac{662 \text{ m}}{2 \text{ s}}$.
