## ~~Microeconometrics Using Stata — GBV~~

This second edition covers over ten years of both enhancements to Stata and developments in the methods most commonly-used in empirical microeconometrics analysis. Our target user base consists of practitioners of applied microeconometrics, and the focus of the book remains the use of linear and nonlinear regression methods for cross-section and short panel data.

Instead of using mfx and the user-written margeff commands, the revised edition uses the new margins command, emphasizing both marginal effects at the means and average marginal effects. Factor variables, which allow you to specify indicator variables and interaction effects, replace the xi command.
