Aliki takes readers on a guided tour that begins with grazing cows, proceeds through milking and a trip to the dairy, and ends with some different foods made from milk. This revised edition of Aliki's 1974 *Green Grass and White Milk* is an even more fun-filled and informative explanation of milk's trip from green grass, to cow, to a cool glass on the table.

Briefly describes how a cow produces milk, how the milk is processed in a dairy, and how various other dairy products are made from milk.

A young girl spends a day helping her father milk their cows, as she does throughout the year.

This lively trip to the dairy farm introduces calves, heifers, and milkers.

Explains how cows produce milk and how it is processed before being delivered to stores.

Following a day in the life of Clarabelle, one of 1,200 cows on a Wisconsin dairy farm, we learn what it takes for a cow to produce life-giving milk and also by-products like electricity. The manure that Clarabelle and her herdmates create not only generates electricity, it provides fresh bedding for cow stalls and fertilizer for the crops grown to feed the cows. Vibrant close-up photographs capture Clarabelle, her calf, and the youngest members of this multi-generational farm family, Josh and Sam, sharing the workload.

"Where is milk from? How is it made?"--Back cover.

Describes the physical and environmental differences between turtles and tortoises, including the thickness of their shells, where they live, and what they eat.
