As today's spark-ignition and diesel engines have to fulfil constantly increasing demands with regard to CO2 reduction, emissions, weight and lifetime, detailed knowledge of the components of an internal combustion engine is absolutely essential. Automotive engineers can no longer survive without such expertise, regardless of whether they are involved in design, development, testing or maintenance. This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis.

This book takes a completely new look at the Anthroposophical Soul Calendar. It is about the deeper meaning of the fifty-two weekly verses, which has remained essentially unexplored in the last hundred years since the first edition by Rudolf Steiner. A dense veil of Isis was spread over them, of which is well known that no mortal person can lift it. Only the immortal, psycho-spiritual human being, who knows himself at home in the extrasensory, higher worlds, is capable of doing this. Only to him the weekly verses reveal themselves as a travel guide through these worlds and lift him up to ever higher spiritual-cosmic realms until he reaches the experience of God, from where he gradually descends again into a new life on Earth, enriched in spirit and fertilized in his soul. If the reader embarks on this journey, the spiritual archetype of the Soul Calendar is ultimately unveiled to him and he achieves an extended understanding of Man and Christ. By many quotations from Rudolf Steiner's lectures and books, the author virtually lets Steiners himself elucidate the breathtaking depths of his mysterious weekly verses.
