Muslims, we desperately need to start talking about mental ...

Muslim adolescents tend to be more traditional with family, social, and religious values. This value system plays an important role in their likelihood of seeking and accepting professional help for depression.

Attitudes toward depression among a sample of Muslim ...

An intersectionalist framework proposes that the process and effects of the stigmatization of, for example, a working-class Muslim woman with depression will differ from that of a middle-class White woman with depression not only in degree (i.e., 'more' or additive stigma), but in kind (i.e., qualitatively different stigma with fundamentally different effects on the stigmatized individual).

Mental Health Stigma in the Muslim Community

Religious belief is an important determinant of mental health, depression is the mental illness responsible for the largest disease burden globally, and Islam is the fastest growing world religion. Here we systematically review the literature on the engagement of Muslim patients in the treatment of depression.

Interventions for treating depression in Muslim Patients ...

Depression is a widespread challenge that affects people in all cultures. Yet, despite the growth of the Muslim population in the United States, little research has been conducted on this topic with members of this cultural group.
