This book has been designed to help medical students succeed with their histology classes, while using less time on studying the curriculum. The book can both be used on its own or as a supplement to the classical full-curriculum textbooks normally used by the students for their histology classes. Covering the same curriculum as the classical textbooks, from basic tissue histology to the histology of specific organs, this book

is formatted and organized in a much simpler and intuitive way. Almost all text is formatted in bullets or put into structured tables. This makes it quick and easy to digest, helping the student get a good overview of the curriculum. It is easy to locate specific information in the text, such as the size of cellular structures etc. Additionally, each chapter includes simplified illustrations of various histological features. The aim of the book is to be used to quickly brush up on the curriculum, e.g. before a class or an exam. Additionally, the book includes guides to distinguish between the different histological tissues and organs that can be presented to students microscopically, e.g. during a histology spot test. This guide lists the specific characteristics of the different histological specimens and also describes how to distinguish a specimen from other similar specimens. For each histological specimen, a simplified drawing and a photomicrograph of the specimen, is presented to help the student recognize the important characteristics in the microscope. Lastly, the book contains multiple “ memo boxes ” in which parts of the curriculum are presented as easy-to-remember mnemonics.

she was launched into a compelling, crash course in how to integrate body, mind and spirit into health and wholeness. Anyone who reads this book will go away with a deeper understanding of the suffering from a sudden, threatening medical diagnosis - from seeking and researching the best treatment, to inner family relationships, to financial pressures, and to marital stressors. The author gives voice to those unable to share their anguish, fear and distress, which encompass all aspects of life. With her naked, gut-wrenching honesty, the author gives support and permission for others to share their own story of suffering, no matter the cause, with the same honesty and vulnerability, as we all struggle in the human family. The author chooses not to wallow in the victim role, but instead, uses the simple gifts that are available to all of us, such as, being fully present to Nature, the practice of journaling, meditation and dream work. She crawled, ran and sometimes danced into health and wholeness with the determination of a victor focused on learning each life lesson - lessons that will inspire everyone.. One reader said, "It reads like an elegant silk thread weaving its way through a life filled with truth, passion, integrity, raw pain and love, grounded in the unwavering connection between the unconditional love of God and one woman. My desire is to read it again and give this book to any human being. It is a rich description of a life lived well and there is much to learn for all of us."
