Examples of definitions:

Modular construction A
modern construction
method whereby the
building is constructed
using prefabricated or
pre-assembled building
sections or modules.

The three-dimensional
building sections are

Acces PDF Ocr Biology F215

typically fabricated and assembled in an enclosed factory environment and then delivered to site, ready for installation. Modular construction is aimed at minimising construction time by standardising design components, providing consistent quality and allowing site preparation and building activities to

Acces PDF Ocr Biology F215

commence concurrently with the construction of the factory-made modules. Snagging The process of formally inspecting the construction works to identify any incomplete works or defects in completed works. A snagging list (or ' punch list ') is a schedule of defects resulting from this

inspection. These items typically need to be rectified prior to the issuing of a completion certificate or handing-over of the works although in some cases a completion certificate will be issued with a snagging list attached.

This book provides a review of the theoretical, empirical, and
