Oracle Access Management provides innovative new services that complement traditional access management capabilities. It not only provides Web SSO with MFA, coarse grained authorization and session management but also provides standard SAML Federation and OAuth capabilities to enable secure access to external cloud and mobile applications.

Troubleshooting Oracle Access Manager

Oracle Access Manager addresses each user population and LDAP directory store as an identity domain. Each identity domain maps to a configured LDAP User Identity Store that is registered with Oracle Access Manager. Multiple LDAP stores can be used with each one relying on a different supported LDAP provider.
