'Gender and Governance in Rural Services' provides policy-relevant knowledge on strategies to improve agricultural and rural service delivery with a focus on providing more equitable access to these services, especially for women. It focuses India, Ethiopia, and Ghana, and focuses on two public services: agricultural extension, as an example of an agricultural service, and on drinking water, as an example of rural service that is not directly related to agriculture but is of high relevance for rural women. It provides empirical microlevel evidence on how different accountability mechanisms for agricultural advisory services and drinking water provision work in practice, and analyzes factors that influence the suitability of different governance reform strategies that aim at making service provision more gender responsive. It presents major findings from the quantitative and qualitative research conducted under the project in the three countries, which are analyzed in a qualitative way to identify major patterns of accountability routes in agricultural and

rural service provision and to assess their gender dimension. The book is intended for use by a wide audience interested in agricultural and rural service provision, including researchers, members of the public administration, policy makers, and staff from nongovernmental organizations (NGOs) and international development agencies who are involved in the design and management of reform efforts, projects, and programs dealing with rural service provision.

Focusing on the issue of the Oromo national struggle for liberation, statehood, and democracy, this book critically examines the dialectical relationship between Ethiopian colonialism and Oromo culture, epistemology, politics, and ideology in the context of the accumulated collective grievances of the Oromo nation. Specifically, the book identifies chains of sociological and historical factors that facilitated the development of Oromummaa (Oromo nationalism) and the Oromo national movement. It demonstrates how the Oromo national movement has been challenging and transforming Ethiopian imperial politics, tracks the different forms and phases of the movement, and maps out its future direction. Currently, the Oromo are the largest ethno-national group and political minority in the Ethiopian Empire. They were colonized and incorporated into Ethiopia as colonial subjects in the last decades of the 19th century through the alliance of Abyssinian/Ethiopian colonialism and European imperialism. Since their colonization, the Oromo people have been treated as second-class citizens and have been economically exploited and culturally and politically suppressed.

Despite the fact that Oromo resistance to Ethiopian colonialism existed during the process of their colonization and subjugation, it was only in the 1960s and 1970s that Oromo nationalists initiated organized efforts to liberate their people. Presently, Oromo nationalism plays a central role in Ethiopian politics.

We are now our own elders, as we must forget about your own personal platitudes whereas sometimes some lights that shines twice as bright, burns half as long, as sometimes we all tend to shine ever so brightly. For one moment, have you ever possibly & conceivably considered your way of thinking about the world is totally wrong. The main problem we all are facing is that so much research is based upon biases & personal opinions, and not pure research. This writer submits that a person or persons can never claim to be a true intellectual unless they void themselves of personal perfidiousness & only concentrate on the true facts or fruits of pure research. For what is intellect without deductive & constructive reasoning, & not from personal perspectives, but from the collective facts as presented. For example; when I open a door & describe what's on the other side may be much different than another, When in fact, what's on the other side of the door, is what's on the other side of the door. The truth is, what ever is on the other side of that door, Is just that, does that make sense? When you assume, To a degree and for a moment, you always convey & show your ignorance in anything that you care to assume for a fraction of a second. As some relative assumptions may seem more creditable in the areas of intellect & reasoning, others are blind

arrogance & opportunism coupled with the instincts to naturally & progressively inquire.

The book examines, compares, and contrasts the African American and Oromo movements by locating them in the global context, and by showing how life chances changed for the two peoples and their descendants as the modern world system became more complex and developed. Since the same global system that created racialized and exploitative structures in African American and Oromo societies also facilitated the struggles of these two peoples, this book demonstrates the dynamic interplay between social structures and human agencies in the system. African Americans in the United States of America and Oromos in the Ethiopian Empire developed their respective liberation movements in opposition to racial/ethnonational oppression, cultural and colonial domination, exploitation, and underdevelopment. By going beyond its focal point, the book also explores the structural limit of nationalism, and the potential of revolutionary nationalism in promoting a genuine multicultural democracy.

Ethiopia remain independent under the onslaught of European expansionism while other African political entities were colonized? And why must Ethiopia be considered a single cultural region despite its political, religious, and linguistic diversity? Donald Levine's interdisciplinary study makes a substantial contribution both to Ethiopian interpretive history and to sociological analysis. In his new preface, Levine examines Ethiopia since the overthrow of the monarchy in the 1970s. "Ethiopian scholarship is in Professor Levine's debt. . . . He has performed an important task with panache, urbanity, and learning."—Edward Ullendorff, *Times Literary Supplement* "Upon rereading this book, it strikes the reader how broad in scope, how innovative in approach, and how stimulating in arguments this book was when it came out. . . . In the past twenty years it has inspired anthropological and historical research, stimulated theoretical debate about Ethiopia's cultural and historical development, and given the impetus to modern political thinking about the complexities and challenges of Ethiopia as a country. The text thus easily remains an absolute must for any Ethiopianist scholar to read and digest."—J. Abbink, *Journal of Modern African Studies*
