"People of the lie" are what Peck calls evil people -- those who refuse to acknowledge their own sin, who scapegoat other people instead, not just occasionally but routinely. Peck believes evil people are both common and ordinary-looking, more likely to be a church deacon than a psychopath, because they create a respectable veneer that belies their callous, independent hearts. They often ...

A gripping book from the bestselling author of hugely popular self-help book, *The Road Less Travelled*. Leading psychiatrist and self-help pioneer Dr M.Scott Peck reveals his encounters with evil, during sessions with patients of his psychiatric therapy. "The patient suddenly resembled a writhing snake of great strength. . . More frightening than the writhing body, however, was the face. The eyes were hooded with lazy reptilian torpor. . . " This is the second bestselling book by Dr M. Scott Peck. In this gripping psychology book, the leading psychiatrist describes his encounters during psychiatric therapy with patients who are not merely ill but manifestly evil - *People of the Lie*. This brilliant, disturbing book forces us to confront the darker side of our natures and to recognise that without spiritual and religious dimension, modern psychiatry cannot claim to understand human nature or behaviour. It is a worthy successor to *The Road Less Travelled*.

Read this thought-provoking, critically acclaimed novel (6 starred reviews!!!) from Frances Hardinge, winner of the Costa Book of the Year, Costa Children's Book Award, and Horn Book-Boston Globe Award. Faith Sunderly leads a double life. To most people, she is reliable, dull, trustworthy—a proper young lady who knows her place as inferior to men. But inside, Faith is full of questions and curiosity, and she cannot resist mysteries: an unattended envelope, an unlocked door. She knows secrets no one suspects her of knowing. She knows that her family moved to the close-knit island of Vane because her famous scientist father was fleeing a reputation-destroying scandal. And she knows, when her father is discovered dead shortly thereafter, that he was murdered. In pursuit of justice and revenge, Faith hunts through her father’s possessions and discovers a strange tree. The tree bears fruit only when she whispers a lie to it. The fruit of the tree, when eaten, delivers a hidden truth. The tree might hold the key to her father’s murder—or it may lure the murderer directly to Faith herself. Frances Hardinge is the author of many acclaimed novels, including *Cuckoo Song*, which earned five starred reviews.

Three former CIA officers share their techniques for lie detection, outlining methods for identifying deceptiveness as revealed by verbal and non-verbal behaviors from facial expressions and grooming gestures to invoking religion and using qualifying language.

A candid memoir of denial, stolen identities, betrayal, faking it, and coming out. Do you know me?, the email began, sparking tremors of fear that turned into a full quake of panic when William Dameron discovered that his selfie had been stolen by strangers. On social networks and dating sites, his image and identity--a forty-year-old straight white male--had been used to hook countless women into believing in lies of love and romance. Was it all an ironic cosmic joke? Almost a decade prior, William himself had been living a lie that had lasted for more than twenty years. His secret? He was a gay man, a fact he hid from his wife and two daughters for almost as long as he had hidden it from himself. In this emotional and unflinchingly honest memoir of coming out of the closet late in life, owing up to the past, and facing the future, William Dameron confronts steroid addiction, the shame and homophobia of his childhood, the sledgehammer of secrets that slowly tore his marriage apart, and his love for a gay father of three that would once again challenge the boundaries of trust. At the true heart of *The Lie* is a universal story about turning self-doubt into self-acceptance and about pain, anger, and the long journey of both seeking and giving forgiveness.

The founder of the Foundation for Community Encouragement draws on his counseling experience to lead readers to the spiritual simplicity that lies on the other side of complexity and explains how to cope with the fears and shortcomings of life

A Washington Post Notable Book of the Year As seen on the Netflix series Explained From the best-selling author of *Cosmopolitanism* comes this revealing exploration of how the collective identities that shape our polarized world are riddled with contradiction. Who do you think you are? That's a question bound up in another: What do you think you are? Gender. Religion. Race. Nationality. Class. Culture. Such affiliations give contours to our sense of self, and shape our polarized world. Yet the collective identities they spawn are riddled with contradictions, and crated with falsehoods. Kwame Anthony Appiah's *The Lies That Bind* is an incandescent exploration of the nature and history of the identities that define us. It challenges our assumptions about how identities work. We all know there are conflicts between identities, but Appiah shows how identities are created by conflict. Religion, he demonstrates, gains power because it isn't primarily about belief. Our everyday notions of race are the detritus of discarded nineteenth-century science. Our cherished concept of the sovereign nation--of self-rule--is incoherent and unstable. Class systems can become entrenched by efforts to reform them. Even the very idea of Western culture is a shimmering mirage. From Anton Wilhelm Amo, the eighteenth-century African child who miraculously became an eminent European philosopher before retiring back to Africa, to Italo Svevo, the literary marvel who changed citizenship without leaving home, to Appiah's own father, Joseph, an anticolonial firebrand who was ready to give his life for a nation that did not yet exist, Appiah interweaves keen-edged argument with vibrant narratives to expose the myths behind our collective identities. These "mistaken identities," Appiah explains, can fuel some of our worst atrocities—from chattel slavery to genocide. And yet, he argues that social identities aren't something we can simply do away with. They can usher in moral progress and bring significance to our lives by connecting the small scale of our daily existence with larger movements, causes, and concerns. Elaborating a bold and clarifying new theory of identity, *The Lies That Bind* is a ringing philosophical statement for the anxious, conflict-ridden twenty-first century. This book will transform the way we think about who—and what—"we" are.

Golf. It's the ultimate head game. And when nothing but the best advice will do, along comes M. Scott Peck, M.D., the celebrated psychiatrist and author of the best-selling self-help book of all time, *The Road Less Traveled*. In *Golf and the Spirit*, M. Scott Peck writes a book for beginners and masters alike—and even for nongolfers. It goes beyond mechanics to explore the deeper issues, ways of successfully managing the emotional, psychological, and spiritual aspects of this most wonderful, maddening, deflating, and inspiring game. Playing side by side with M. Scott Peck on an imaginary course of his own design—complete with illustrations of each hole—you will come to see the profound truths in this seemingly simple game. Appreciate that life is not linear. Come to understand your own anger and how to heal that which gets in your way. Accept the gifts of humility. Appreciate kenosis, the process by which the self empties itself of self. Benefit from teachers. Know that in weakness often there is strength. Realize that to experience the blessings of golf and life fully, you must accept the divinity that underlies all things. Like the best-selling volumes of Harvey Penick and Michael Murphy, *Golf and the Spirit* makes a unique contribution to the literature of golf and life. It goes beyond the body to address the heart and soul of the game, creating a rare opportunity for transformation in the lives of its readers, both on and off the fairway. It seems to me the human condition is most basically that we are willful creatures living in a world that, much of the time, doesn't behave the way we want it to. We live in the tension between our will and reality. Sometimes with great effort and expertise, we can change reality or bend it to our will. At other times—also with great effort and expertise—it is we who must change by coming to accept the limitations of the world and of ourselves. How we do this—how we deal with the hazards of life—is quite akin to how we deal with the hazards of a golf course. Sooner or later golfers who stick with the game long enough will almost always come to see it as a metaphor for life. But the word metaphor fails to do justice to all that golf has to teach us. I would go even further and say that, in its own way, golf is life and, not only that, life condensed. If we choose to use it as such, I believe that golf, next to marriage and parenthood, can routinely be the greatest of life's learning opportunities.
