Biography of Alan Tampan, currently Field Tech at Philips Lifeline.

The tools and answers you need to help your parents receive the care they deserve.

English competes with Tagalog and Taglish, a mixture of English and Tagalog, for the affections of Filipinos. To understand the competing ideologies that underlie this switching between languages, this book looks at the language situation from multiple perspectives. Part A reviews the social and political forces that have propelled English through its life cycle in the Philippines from the 1898 arrival of Admiral Dewey to the 1998 election of Joseph Estrada. Part B looks at the social support for English in Metro Manila and the provinces with a focus on English teachers and their personal and public use of English. Part C examines the language of television sport broadcasts, commercials, interviews, sitcoms, and movies, and the language of newspapers from various linguistic, sociolinguistic, and sociocultural perspectives. The results put into perspective the short-lived language revolution that took place at the turn of the twenty-first century.

There's no place like home. But home presents unique safety challenges. For a person with Alzheimer's disease, chemical hazards, driving, and falls pose major health risks in the home. Wandering away from caregivers also seriously endangers health and well-being. Even when these issues are addressed, caregivers are faced with many more questions about the safest living arrangements for their loved one. It's hard to know when home services might be beneficial, whether your loved one should move in with you, or if an assisted living facility will be a good fit. The simple checklists in this book will help you answer these questions and teach you how to: · Modify your loved one's home to reduce confusion. · Recognize the warning signs for wandering. · Identify the right time to hire home healthcare. · Know when a long-term care facility might be beneficial. · Decide if a memory care unit is right for your loved one. Having tackled these issues in our own lives, we've created these checklists to help you with the large and small decisions you will face about the place your loved one calls home. Take the guesswork out of living arrangements. Order now and find the way home.

Intelligent Technologies for Bridging the Grey Digital Divide offers high-quality research with both industry- and practice-related articles in the broad area of intelligent technologies for seniors. The main focus of the book is to provide insights into current innovation, issues to be resolved, and approaches for widespread adoption so that seniors, their families, and their caregivers are able to enjoy their promised benefits.

As the older population in the United States is becoming more racially and ethnically diverse, it is important to understand the characteristics, the potential, and the needs of this population. In this new and fully revised edition of Aging and Diversity, Chandra Mehrotra and Lisa Wagner address key topics in diversity and aging, discussing how the aging experience is affected by not only race and ethnicity but also gender, religious affiliation, social class, rural-urban community location, and sexual orientation and gender identity. Taking this broad view of human diversity allows the authors to convey some of the rich complexities facing our aging population - complexities that provide both challenges to meet the needs of a diverse population of elders and opportunities to learn how to live in a pluralistic society. Mehrotra and Wagner present up-to-date knowledge and scholarship about aging and diversity in a way that engages readers in active learning, placing ongoing emphasis on developing readers' knowledge and skills, fostering higher order thinking, and encouraging exploration of personal values and attitudes.

In "Shock of Gray," Ted Fishman explains the astounding economic and political changes we face as our world suddenly grows old.

Make your Apple Watch your new best friend! From accessing messages to getting quick directions, the latest smart watches do a whole lot more than just tell time. And the latest version of the Apple Watch is one of the most powerful iterations of these handy devices you can own. In Apple Watch For Dummies, you'll get step-by-step guidance on how to use all the best features of the Apple Watch. You'll learn how to make payments with a flick of your wrist using Apple Pay, keep track of your activity and sleep, monitor your heart health in real time, and even turn your watch into a digital walkie-talkie. This easy-to-read guide will also show you how to: Stay in touch by sending and receiving text messages and emails with your Apple Watch Track your fitness and sleep with Apple Watch, and have it monitor your health and even detect a sudden fall Learn how to stream Apple Music playlists and podcasts to wireless headphones Customize your watch face to look exactly the way you want it to look, from retro-chic to futuristic fun Apple Watch For Dummies is a must-read resource for Apple enthusiasts everywhere. Whether you're an Apple Watch newbie or you've been using one since they first came out and just need a refresher, this book has everything you need to get the most out of one of the coolest pieces of wearable tech on the market today.

Two mega-trends of modern culture, the rapid aging of the population and the inexorable advances in technology, have fueled the development of gerontechnology--the use oftechnology to sustain individual autonomy to an advanced age. This expansive bookencompasses state-of-the-art research in gerontechnology and promising new technologies.products, and services that can improve activities of daily living, general health, and wellbeingof older individuals. It addresses current and future applications in such crucial areasas mobility and transportation, assistive devices, smart homes for senior citizens, in-hometechnologies, safety and privacy, and research and development highlighting--amongothers--design. Topics include, but are not limited to, virtual environments as a research tool, sensation, perception, and cognition research advancements, novel accessibility challenges to information and communication technology, as well as the evolving characteristics of the elderly. These are among the welcome developments addressed in the book. Contributors from around the globe, including the UK, Germany, Japan, Canada, The Netherlands, Korea, the United States, and more, bring unprecedented cross-cultural insight to the intersections of aging phenomena and technology. Key Features: Disseminates empirically proven findings and evidence-based theories, models, and concepts Written by world-recognized leaders in the field of technology and aging Reflects the global usage of gerontechnological applications Includes new technologies, research, and applications for virtual environments, smart homes, assistive technology care, and robotics Discusses computer-assisted social engagement, technology-facilitated caregiving, business case examples, and more

State-of-the-art developments in multiple new technologies for older adult care Grounded in a unique team-based geriatrics perspective, this book delivers a broad range of current, evidence-based knowledge about innovative technology that has the potential to advance the care and well being of older adults. It provides key information about the development, selection, and implementation of technology products, and describes research evidence, education-based initiatives, and systems thinking. The book also examines challenges and barriers to implementation, adoption and innovation. From telehealth and assistive technology in the home to simulation and augmented reality in educational settings, the text provides a hands-on, field-tested articulation of how products can aid in the transitional care process, chronic care delivery, and geriatrics/gerontology education. It discusses technology developments in rural areas, home telehealth, wearable technology, personalized medicine, social robots, technology to assist seniors with cognitive impairments, the potential of artificial intelligence to enhance health care of older adults. The text is written to help health care professionals select the appropriate technology for their needs. Key Features: Describes the most current technology resources, evidence, and developments for older adult care Based on a team-centered approach Written by interprofessional health care providers experienced in implementing, developing and adopting technology to assist older adults Includes case studies depicting technology-related successes and failures Addresses the challenges, barriers, and opportunities for transforming aging with technology across transitions of care
