This third edition provides 2900 multiple choice questions on human anatomy and physiology, and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses, and as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

The answer to the first essay question in Human Physiology's Review Activities at the end of each text chapter is provided in this guide, along with helpful hints on how to answer essay questions on

will enhance the learning experience. In addition to the wealth of information it provides, Making Sense of Human Anatomy and Physiology sets in place a bedrock of learning skills for future study, regardless of the subject. Students of beauty therapies, holistic and complementary therapies, and fitness professionals--yoga teachers, personal trainers, sports coaches, and dance teachers--will gain not only a basic understanding of anatomy and physiology, but also the skills to learn such a subject. Allied professionals in nursing, biomedical science, dentistry, occupational therapy, physiotherapy, midwifery, zoology, biology and veterinary science will also find this book an invaluable resource. The final chapters offer suggestions for the further exploration of concepts, assessment, learning activities, and applications.
