Step-by-step guide to all the tools and extensions in the Visual Studio 2019 IDE DESCRIPTION This book peeks into every corner of the Visual Studio IDE and will help you get started with the latest 2019 version. Right from installation, you'll discover new features within the tool and the optimal way to use the features you may already know. You'll learn, for example, how to extend Visual Studio with your own customizations, so that you can make it perform the way you want. You will then explore everything about NuGet package, test applications using Live Unit Testing, and learn how to make code templates using the T4 code generation tool. You'll get to grips with the richer JavaScript IntelliSense, which will help you focus more on coding. Moving on, you'll learn to work with the dedicated workloads for data storage and data science. You will also review the more advanced architecture tools concealed within the IDE and finally create cloud-first applications powered by Microsoft Azure using the built-in suite of Azure tools. KEY FEATURES Create and use custom IDE extensions Find, download, and use the best IDE extensions for web, mobile, Azure, and Windows Enhance programming experience and time with debugging tools Enhance coding capabilities with coding tools Test projects proactively Create powerful web, mobile, and Azure solutions for the real world WHAT YOU LEARN By the end of the book, you will be able to tackle any solution for any platform head-on. You will create real-world solutions from start to finish. By using the tools and extensions outlined in this book, you will be able to code better and faster, debug better, share your code with more peers, test your code better, and install or publish your apps quicker and without issues. WHO THIS BOOK IS FOR The book is intended for any .NET developer. You can be a seasoned developer or a newbie just starting out. "Exploits new features of Visual Studio .NET 2003 and the Oracle database 10g. (But concepts and code still apply to the earlier releases, 8i and 9i, that currently comprise most business systems)." Explains Oracle programming using both C# and VB.NET languages; provides a one-stop reference for VS.NET developers working with Oracle. "Excellent resource for J2EE programmers in environments considering moving to a .NET environment (and retaining the Oracle database).

Covers topics including .NET Framework and CLR fundamentals, .NET features, Web services, programming with GDI+, and interoperability, and provides a Visual Basic .NET overview.

Annotation Answers the cry of MS IIS server administrators, covering the upgrade and differences between IIS 5 and IIS 6 quickly without filler. Written by an Apache and IIS expert who can bridge the "Delta" for both open source and Microsoft Web server administrators. Includes information on the IIS 6 changes that affect open source use of the IIS sever covering Apache, Perl, Python, and PHP. In the US IIS runs 9.7 million servers and 5.3 million .com domains for companies like NASDAQ, AT&T, plus more. Microsofts Internet Information Server 6 in an Internet server program that works with the Windows Server 2003 operating systems. IIS is Microsofts answer in the Internet server market to Apache, the open source and #1 Internet server in use. In the US 9.7 million servers run IIS (28% of the market) powering 5.3 million .com domains. Delivered as a free add-on for the Windows 2003 Server. IIS 6 is a major upgrade from version 5 with increased security, better .NET programming integration, and stronger abilities to work with non-Microsoft languages and servers. Martin C. Brown develops programming-heavy Web sites for companies such as HP, Oracle, and his own venture Foodware. His primary language includes Basic, Pascal, C, C++, Java, Perl, and Python. He has over a decade of experience managing mixed-platform networks, covering everything from network design through to top-level staff management. Martin helped to start up one of the largest ISPs in the UK and was technical specialist for another. Don Jones has worked with three generations of Microsoft e-Commerce products in production environments. He served as Senior Web Developer for a major "dot com" startup, and currently provides consulting services for clients nationwide.
