" —Minerva This illuminating account of Britain as a Roman province sets the Roman conquest and occupation of the island within the larger context of Romano-British society and how it functioned. The author first outlines events from the Iron Age period immediately preceding the conquest in AD 43 to the emperor Honorius' s advice to the Britons in 410 to fend for themselves. He then tackles the issues facing Britons after the absorption of their culture by an invading army, including the role of government and the military in the province, religion, commerce, technology, and daily life. Part of the Penguin History of Britain series, An Imperial Possession is the first major narrative history of Roman Britain for a generation. David Mattingly draws on a wealth of new findings and knowledge to cut through the myths and misunderstandings that so commonly surround our beliefs about this period. From the rebellious chiefs and druids who led native British resistance, to the experiences of the Roman military leaders in this remote, dangerous outpost of Europe, this book explores the reality of life in occupied Britain within the context of the shifting fortunes of the Roman Empire.

In BC 55 Julius Caesar came, saw, conquered and then left. It was not until AD 43 that the Emperor Claudius crossed the channel and made Britain the western outpost of the Roman Empire that would span from the Scottish border to Persia. For the next 400 years the island would be transformed. Within that period would see the rise of Londinium, almost immediately burnt to the ground in 60 AD by Boudicca; Hadrian's Wall which was constructed in 112 AD to keep the northern tribes at bay as well as the birth of the Emperor Constantine in third century York. Interwoven with the historical narrative is a social history of the period showing how roman society grew in Britain.

Jones offers a lucid and thorough analysis of the economic, social, military, and environmental problems that contributed to the failure of the Romans, drawing on literary sources and on recent archaeological evidence.
