Across European cities the use of urban space is controversial and subject to diverging interests. On the one hand citizens are increasingly aware of the necessity for self-organising to reclaim green spaces. On the other hand local authorities have started to involve citizens in the governance of urban green spaces. While an increased level of citizen participation and conducive conditions for citizens' self-organisation are a desirable development per se, the risk of functionalising civil society actors by the local authority for neoliberal city development must be kept in mind. Drawing on qualitative and quantitative data collected in 29 European cities from all four European geographic regions, this book examines the governance of urban green spaces and urban food production, focusing on the contribution of citizen-driven activities. Over the course of the book, Schicklinski identifies best practice examples of successful collaboration between citizens and local government. The book concludes with policy recommendations with great practical value for local governance in European cities in times of the growth-turn. This book will be of great relevance to students, scholars, and policy-makers with an interest in environmental governance, urban geography, and sustainable development.

FLINS, originally an acronym for Fuzzy Logic and Intelligent Technologies in Nuclear Science, is now extended to Computational Intelligence for applied research. The contributions to the 10th of FLINS conference cover state-of-the-art research, development, and technology for computational intelligence systems, both from the foundations and the applications points-of-view. Sample Chapter(s). Foreword (55 KB). Evaluation of Manufacturing Technology of Photovoltaic Cells (124 KB). Contents: Decision Making and Decision Support Systems; Uncertainty Modeling; Foundations of Computational Intelligence; Statistics, Data Analysis and Data Mining; Intelligent Information Processing; Productivity and Reliability; Applied Research. Readership: Graduate students, researchers, and academics in artificial intelligence/machine learning, information management, decision sciences, databases/information sciences and fuzzy logic.

The new multi-level exam preparation series for Cambridge ESOL exams which inspires students to better exam results.

'The Delights of Learning Turkish' is a self-study course book that takes the learner from the beginner level to the intermediate level in Turkish. It is designed for English speakers, targeting adult and young adult learners; especially for those planning to settle and live in Turkey or visiting Turkey for business or pleasure. It is a comprehensive, explanatory approach to Turkish language teaching how to construct and use the language both in formal and colloquial forms with dialogues, examples, grammar points, vocabulary and exercises. It shows the grammatical structures in detail with examples, which enables the learners to make their own sentences instead of depending on off-the-shelf phrases. In the book, you can also find general information about the Turkish alphabet and Turkish language as well as notes on Turkish culture in daily life. Covering so many language points, this book is also a grammar reference that targets a wide range of audience including advanced learners. At the end of the book, you will find the keys to the exercises. There are also Turkish - English and English - Turkish glossary sections as well as Turkish proverbs and idioms added to the book with explanations.

Cities in Transition focuses on the sustainability transitions initiated in 40 European cities. The book presents the incredible wealth of insights gathered through hundreds of interviews and questionnaires. Four key domains—local energy systems, local green spaces, local water systems and local labour markets—have been the focus of the field research investigating local potentials for social innovation and new forms of civil society self-organisation. Examining the potential of new organisational frameworks like co-operatives, multi-stakeholder constructions, local-regional partnerships and networks for the success of such transitions, this book presents the key ingredients of a sustainable urban community as a viable concept to address current global financial, environmental and social challenges. Crucial reading for academics and practitioners of urban planning and sustainability in Europe, Cities in Transition is an innovative roadmap for sustainability in changing cities.

The Book of R is a comprehensive, beginner-friendly guide to R, the world's most popular programming language for statistical analysis. Even if you have no programming experience and little more than a grounding in the basics of mathematics, you'll find everything you need to begin using R effectively for statistical analysis. You'll start with the basics, like how to handle data and write simple programs, before moving on to more advanced topics, like producing statistical summaries of your data and performing statistical tests and modeling. You'll even learn how to create impressive data visualizations with R's basic graphics tools and contributed packages, like ggplot2 and ggviz, as well as interactive 3D visualizations using the rgl package. Dozens of hands-on exercises (with downloadable solutions) take you from theory to practice, as you learn: –The fundamentals of programming in R, including how to write data frames, create functions, and use variables, statements, and loops –Statistical concepts like exploratory data analysis, probabilities, hypothesis tests, and regression modeling, and how to execute them in R –How to access R's thousands of functions, libraries, and data sets –How to draw valid and useful conclusions from your data –How to create publication-quality graphics of your results Combining detailed explanations with real-world examples and exercises, this book will provide you with a solid understanding of both statistics and the depth of R's functionality. Make The Book of R your doorway into the growing world of data analysis.

This book is suitable for children age 4 and above. "The Fox and the Stork" is a story about a stork that goes to a fox's house for dinner. The fox decides to make fun of a stork by treating it to a plate of soup. The stork is unable to drink the soup and leaves the fox's house hungry. The stork decides to teach the fox a lesson. The next day when the fox goes to the stork's house for dinner, the stork treats the fox to a tall jar of soup. The fox goes home hungry and realises its mistake.

This is the first volume of essays arising out of a series of high-level seminars held in All Souls College, Oxford during the Spring of 1993. The contributors, among them distinguished judges and academics, have produced essays of sparkling quality which will be essential reading for anyone concerned about the future direction of English law.
