Complex Training. A complex usually has 4-10 exercises, completed for 5-20 reps in a row without taking a rest between them. By doing this, you combine traditional strength exercises with explosive movements which results in a greater rate of force development, which results in increased overall power.

Training programs don't need to be overly complicated to be effective and specifically for myself with limited training experience based on my strength numbers. Prior to this I was doing a conjugate method program and it was a lot of fun using bands, chains, and experimenting with some new lifts I would typically not do.

Consequently, Power Training and Strength Training are not the same thing, even though the terms are often used interchangeably. The main difference between Power Training vs Strength Training is, that strength refers to the ability to overcome resistance, while power refers to the ability to overcome resistance in the shortest period of time.

~~Power Training vs Strength Training -
